1. LOGIN SCREEN

User can login to the system by using [URL:https://www.smarttrack.co//login.php]. Following screen will be displayed to the user to enter login credentials.

- Username
- Password

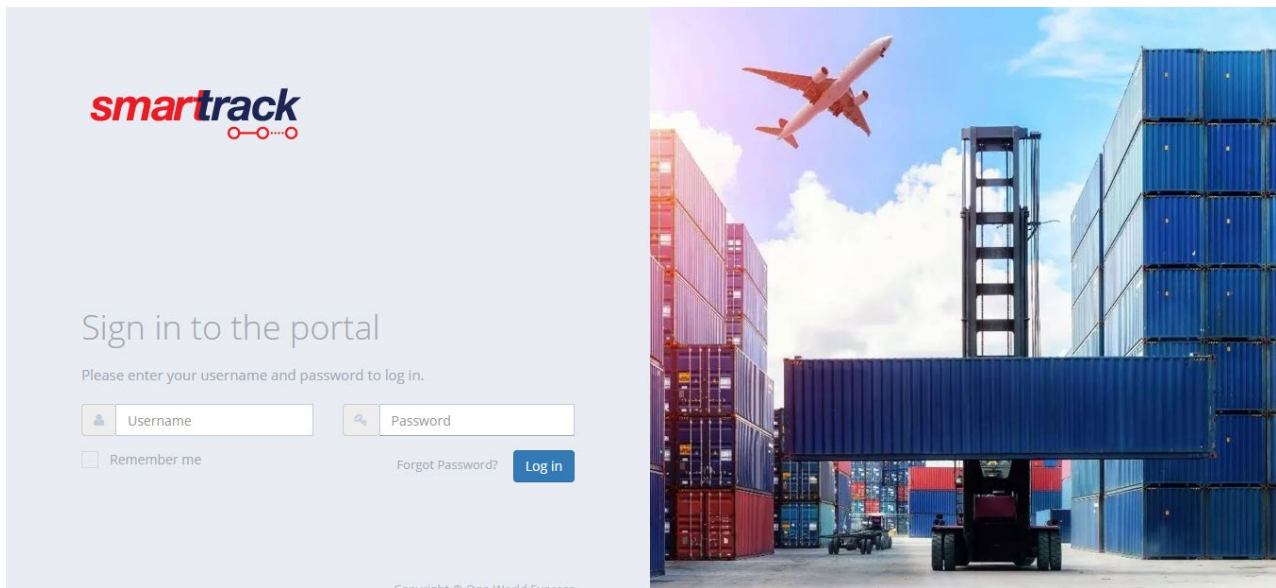

Figure 1-1 user panel Access Information

2. DASHBOARD

When user login to the system with valid credentials, system redirects user to Dashboard as shown below. There are 4 tiles displayed at top of the screen that represents

- Total Shipments
- Label Created
- IN transit
- Delivered

Following these tiles are two graphs displayed that are:

- Shipment Statistics Graph
- Top Countries Graph

User can also expand/collapse both graphs to full screen by clicking on the icon displayed at top right of the graph.

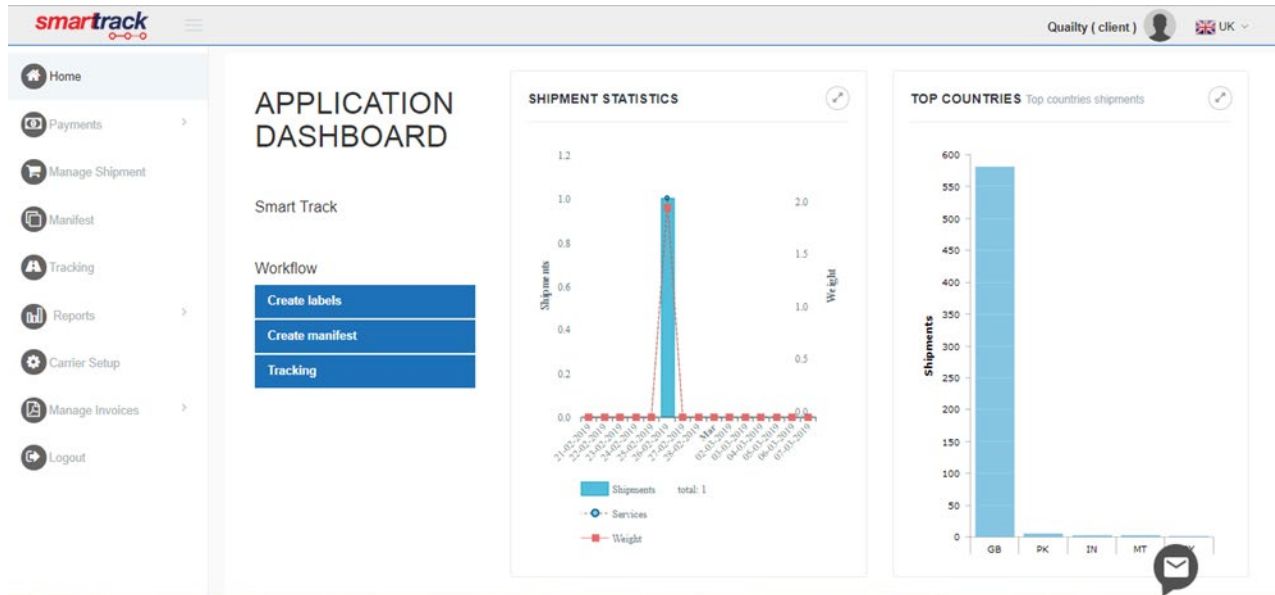

Figure 2-1 Dashboard

3. FIND WAYBILL

User can navigate to Find Waybill module by clicking on Find Waybill tab displayed in navigation panel. There are two sections of the screen:

- Filters and Search
- List of Shipments

User can search on different fields as shown in the screenshot below.

User can manipulate with following actions on the list of shipments displayed

- Operation Manifest
- Billing Hold
- Manual Bulk Price All
- Assign price with CSV upload
- Bulk Vol Weight
- Manual POD update
- Charge Shipment Status

User can also view tracking of any shipment by clicking on tracking number of shipment displayed.

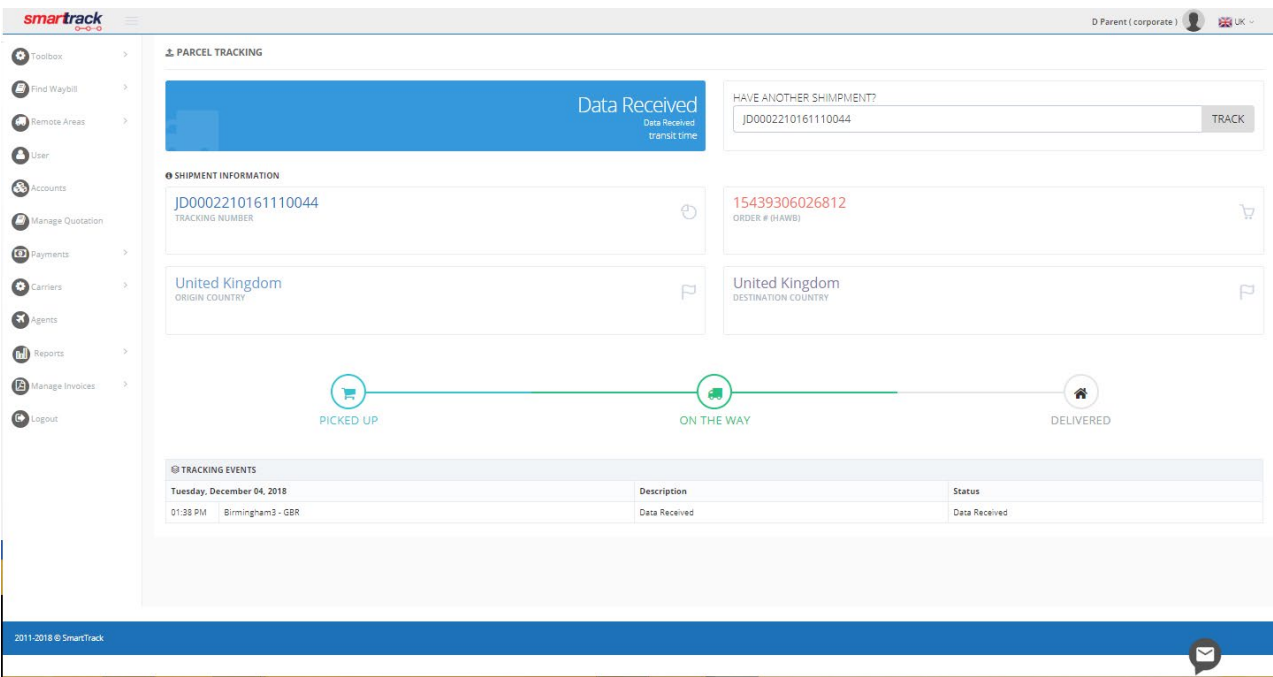

Figure 3-3 Tracking of any shipment

User can view details of any shipment by clicking on hawb number or by double clicking on the record.

The screenshot shows the 'SHIPMENT DETAIL' screen with the following sections:

- Details Table:**

Order No (HAWB)	Invoice No	Service	Claim Submitted	Type
15439335517443		[SWEDEN POST REGISTERED]	No	Dispatch

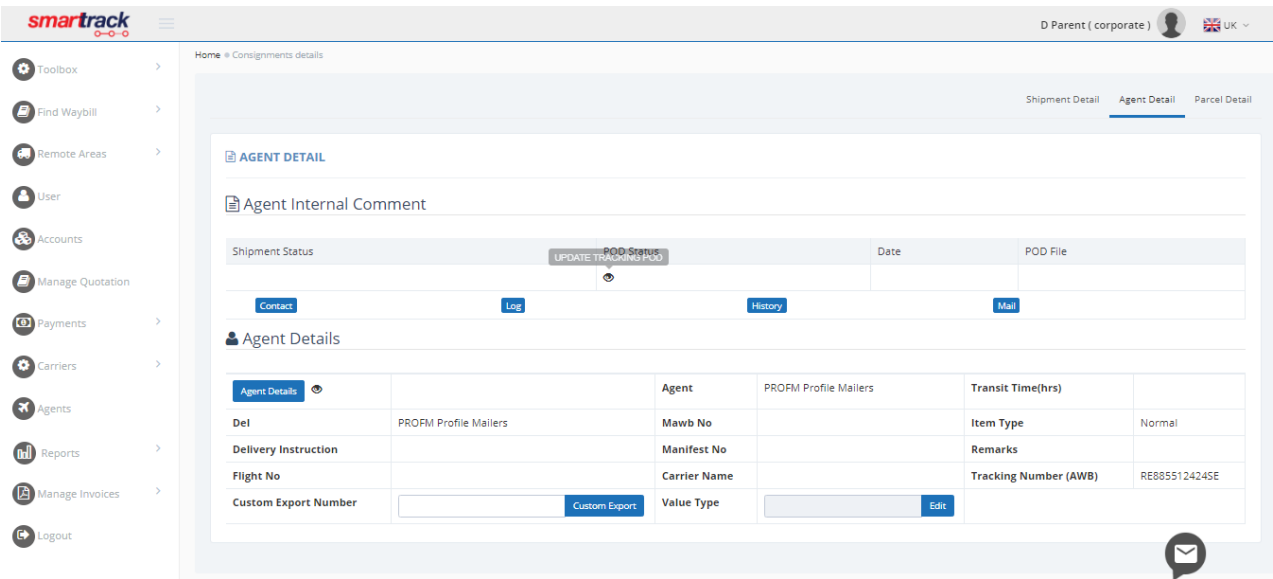

Figure 3-6 Agent Details

User can also view parcel details as well

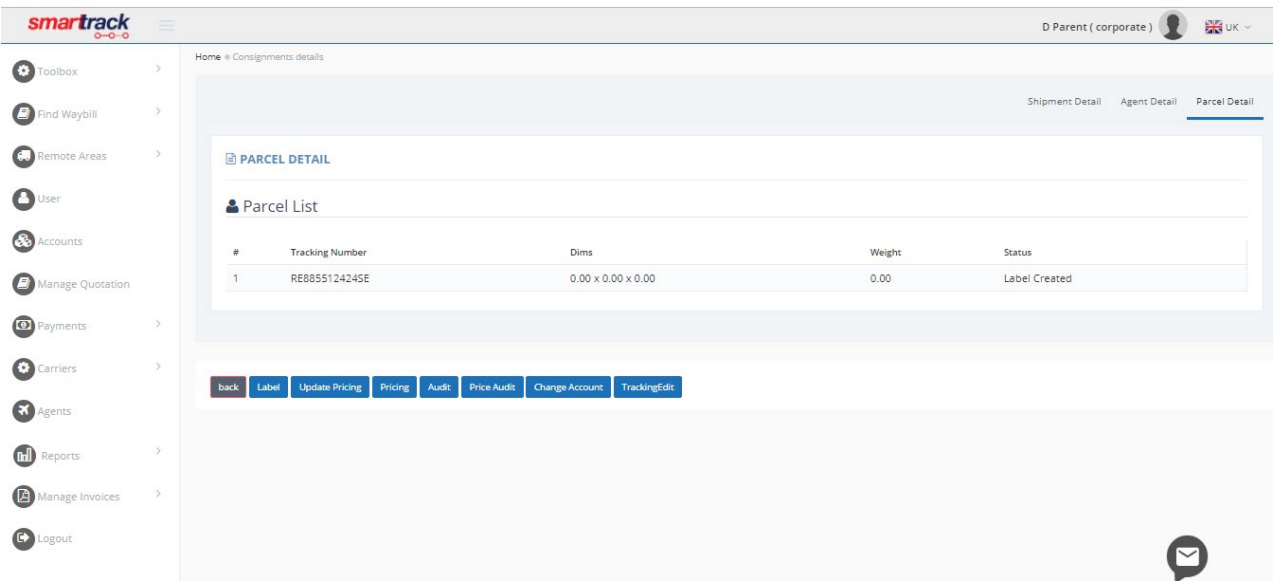

Figure 3-7 Parcel Details

3.1 Generate Invoice

User can generate invoice from find waybill screen. User need to select the account to whom he wants to generate invoice and search for “Not Invoiced” shipments. Then, a “Generate Invoice” button will be displayed.

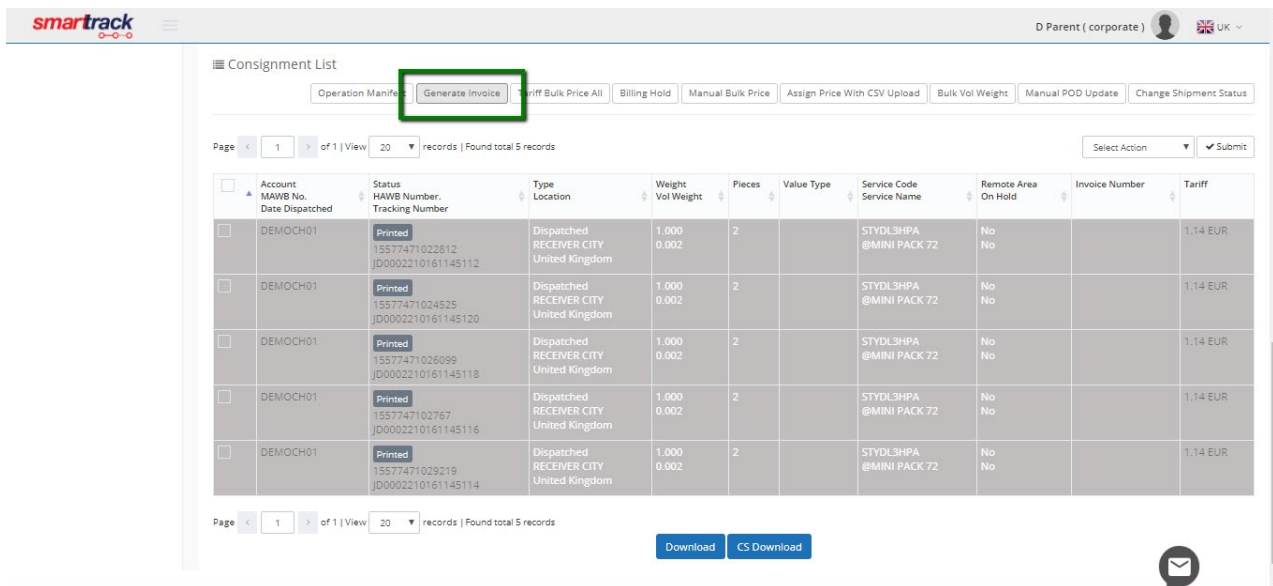

Figure 3-8 Generate Invoice button

When user clicks on this button, a pop up is displayed to check/uncheck fields added in the invoice pdf.

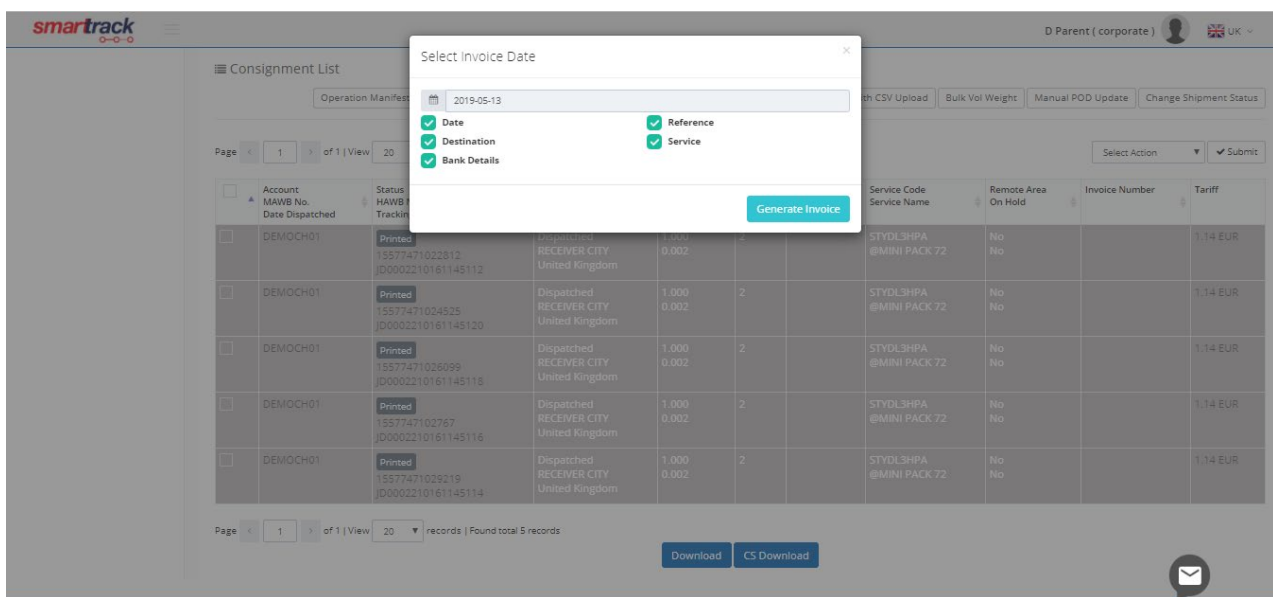

Figure 3-9 Generate Invoice fields

A link is displayed when invoice pdf is generated successfully

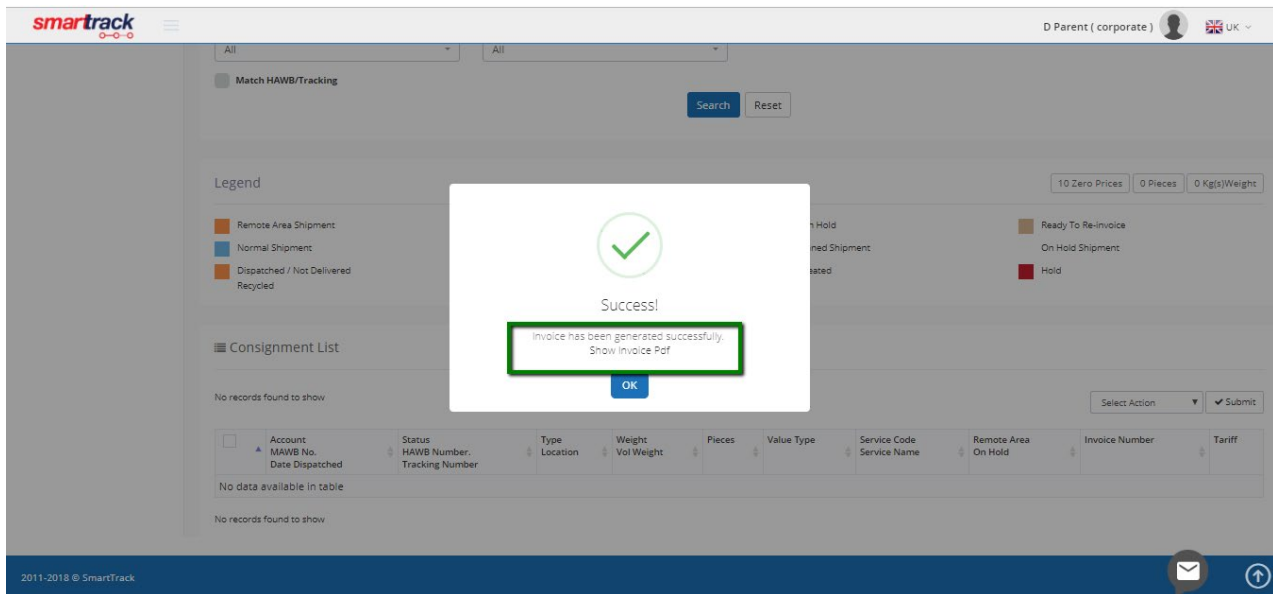

Figure 3-10 Show pdf link

The invoice generated is displayed in next tab upon user selection of “Show Invoice pdf”.

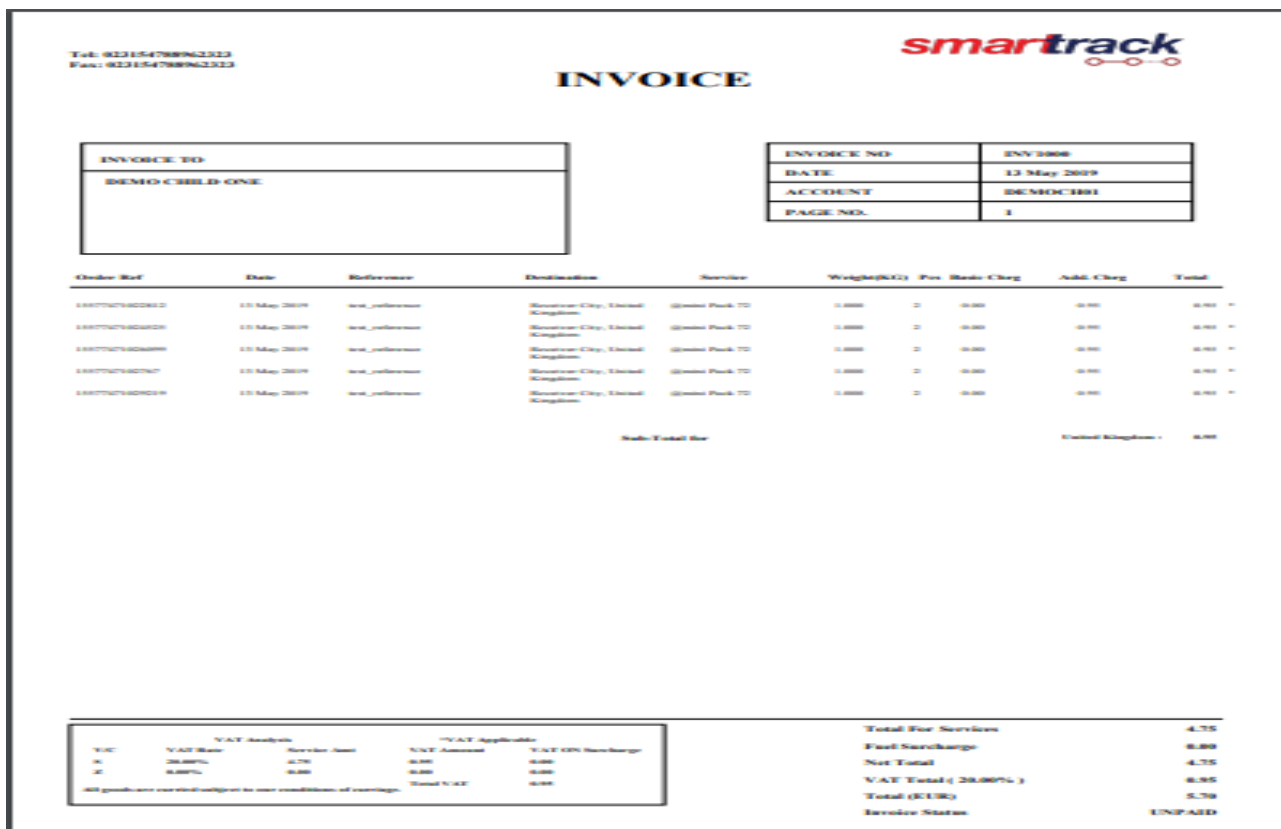

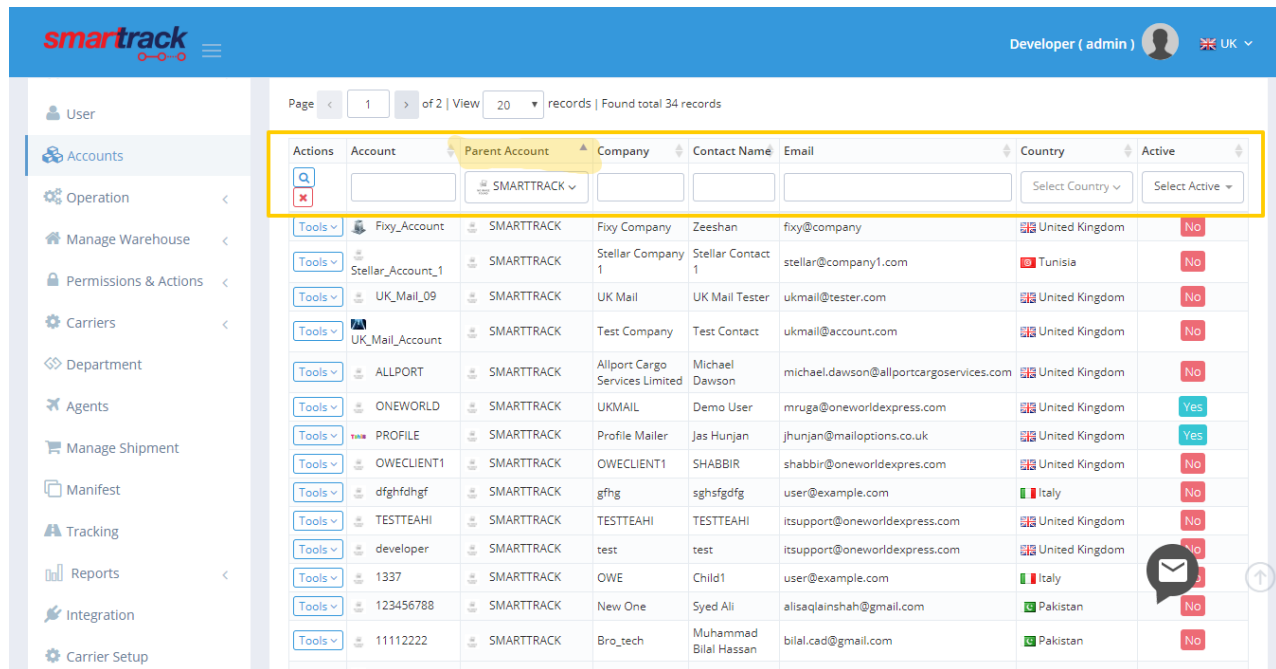

Figure 3-11 Invoice pdf

4. ACCOUNTS

User can navigate to Accounts by clicking on Accounts tab displayed in navigation panel and a list of accounts is displayed to the user. User can also search for accounts depending upon the search displayed on each column. User can also sort the list on ascending/descending order on any column as displayed below.

The screenshot shows the SmartTrack web application interface. On the left is a navigation menu with options like User, Accounts, Operation, Manage Warehouse, Permissions & Actions, Carriers, Department, Agents, Manage Shipment, Manifest, Tracking, Reports, Integration, and Carrier Setup. The 'Accounts' tab is selected. The main area displays a table of accounts. At the top of the table, there are search and sorting controls for each column: Actions, Account, Parent Account, Company, Contact Name, Email, Country, and Active. The 'Parent Account' column is highlighted with a yellow box. The table contains 14 rows of account data, including details like Account Name, Parent Account, Company, Contact Name, Email, Country, and Active status.

5.2. Edit a User

User can edit any user and update its fields by clicking on “Edit” link displayed in Actions drop down. Following screen will be displayed when user click on edit link.

2011-2018 © SmartTrack

Figure 5-4 Edit a User

5.3. Manage Shipment

User is able to go to Manage Shipment section of any user within his hierarchy. He can add New Shipment, can manipulate with existing shipments, can export shipment list. Following screen is displayed when user clicks on “Manage Shipment” link from Actions drop down.

On top of the screen, system will display the available balance of the user. System will list all the history of user transactions. Like in the following screen, user will know the Date of transaction, Method by which he is paying, Credit or Debit amount and Running Balance.

The screenshot shows the SmartTrack web application interface. The top navigation bar includes the SmartTrack logo and a user profile dropdown for 'Quality (client)'. The left sidebar contains various navigation links. The main content area is titled 'Payment History' and displays a table of transactions. The table has columns for Date, Method, Description, Amount, Credit, Debit, and Balance. The transactions listed include shipment payments and a recharge. Above the table, there are filters for 'From' and 'To' dates, and a 'Select Method' dropdown. At the top right of the main area, there is a summary bar showing 'Account Balance 9999.4 GBP' and buttons to 'Download Excel File' and 'Download PDF File'.

Figure 6-1 Payment History

User can download excel file and PDF file as shown below.

Figure 6-4 Add Balance for Prepaid Account

Once, user has added balance in his account, a request will be generated by the system to the Parent account to approve the request. After approval, user will be able to use that balance in generating shipments.

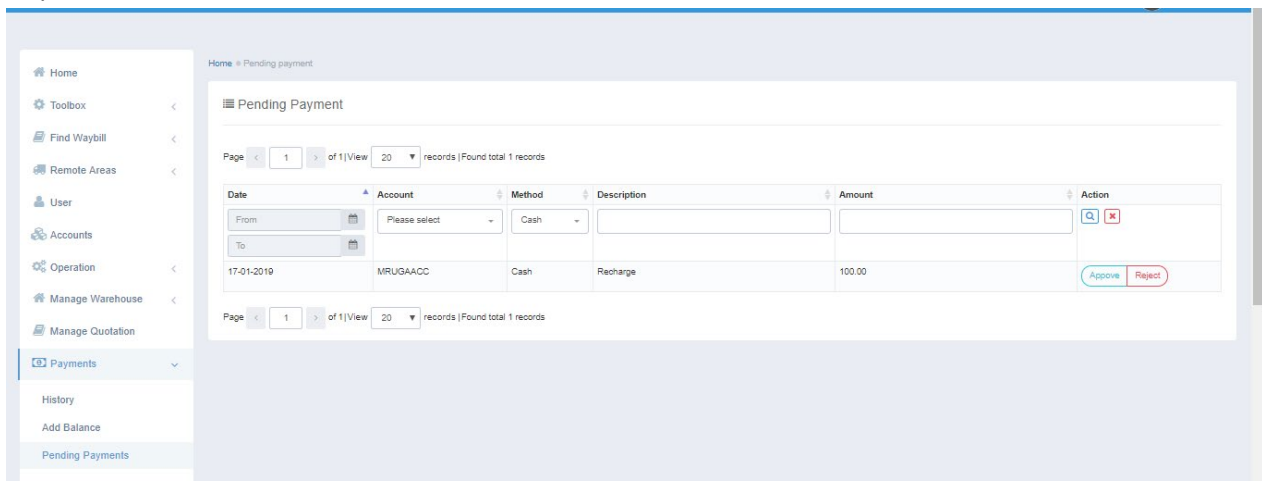

Figure 6-5 Request for Payment Approval

7. MANAGE QUOTATIONS

7.1. Add Manage Quotation

For instance, we have a new user that is not using our system at the moment. But they want to send a parcel and wants to get quotation from our system. We will simply takes its email address and use an account that has the same source and destination as client's requirement. We will populate that account and when we add weight, all available services within weight range along with its pricing will be populated. If user wants to use same pricing then he will select "Member Price" from Price Type and if he wants to manipulate price then he will select "Manual Price" in Price Type. Upon "Save Quotation", a quotation will be saved in quotations list.

8. MANAGE SHIPMENTS

Shipments are basically the parcels that client need to deliver from one place to the other. User can add shipments through following two processes:

- Add New Shipment via the webpage
 - Upload Shipment Data by downloading CSV template and then importing it
- There are three types of shipments base on services
- Dispatch (Source to destination)
 - Collection (Collect parcel from user destination)
 - Drop off (User can submit their parcel nearby his own location)

User will navigate to “Manage Shipment” tab from navigation panel and a list of all shipments are displayed here as shown in the figure below

Created	HAWB	Contact	Country	Weight	Status	Service	Tracking No	Reason	Label
26.02.2019	1551183060	Test	Test City United Kingdom	1.000 Kg	Ready To Print	International Tracked	Parcel List

IMPORT SHIPMENT

Select Account Select User

Select CSV Template

Select file to import

Note:
Please be advised that surcharges apply for remote postcode areas. Please check the postcode listings and your rate card for applicable surcharges. Maximum up-loadable weight per Parcel is 25kg and no longer than 180cm on the longest side for the CSV upload service. However, each service may have different maximum and minimum sizing requirements and parcels may be subject to surcharges for out of gauge, girth or other if they exceed any of the services limitations. Please check your rate card or with your account manager or customer service for clarification on minimum and maximum sizes for the service that you wish to use.

Figure 8-3 Add New Shipment via CSV import

The newly added shipments are displayed in the list with “Ready to Print” status.

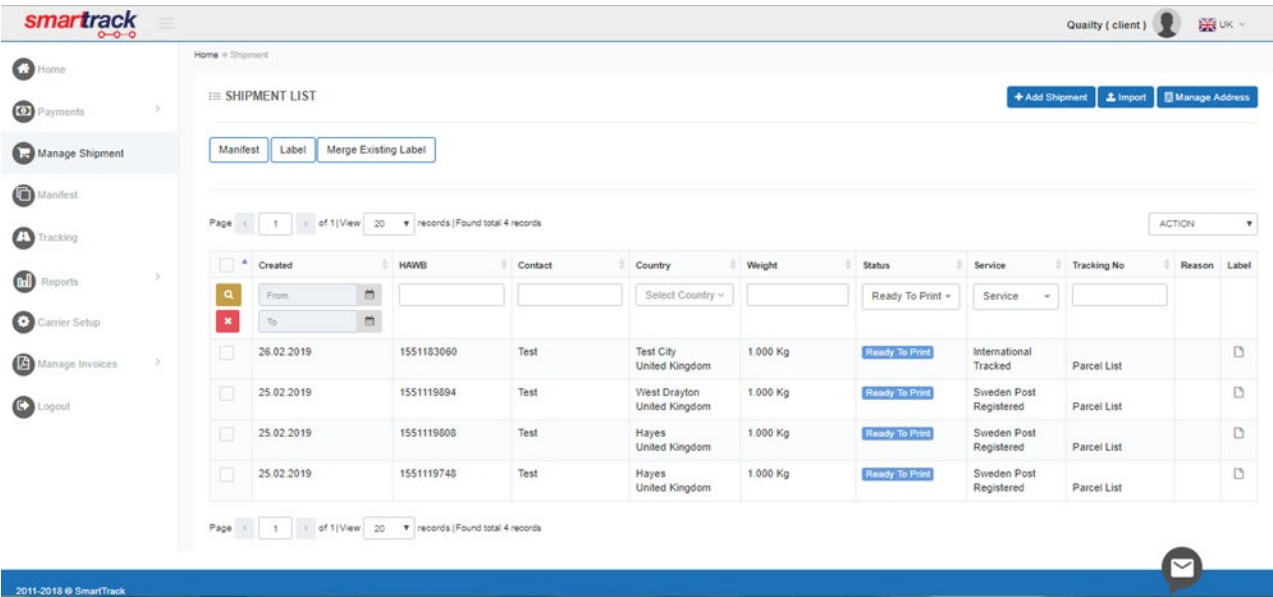

Figure 8-4 “Ready to Print” Shipments

8.3. Generate custom template

User can generate their own template for import csv.

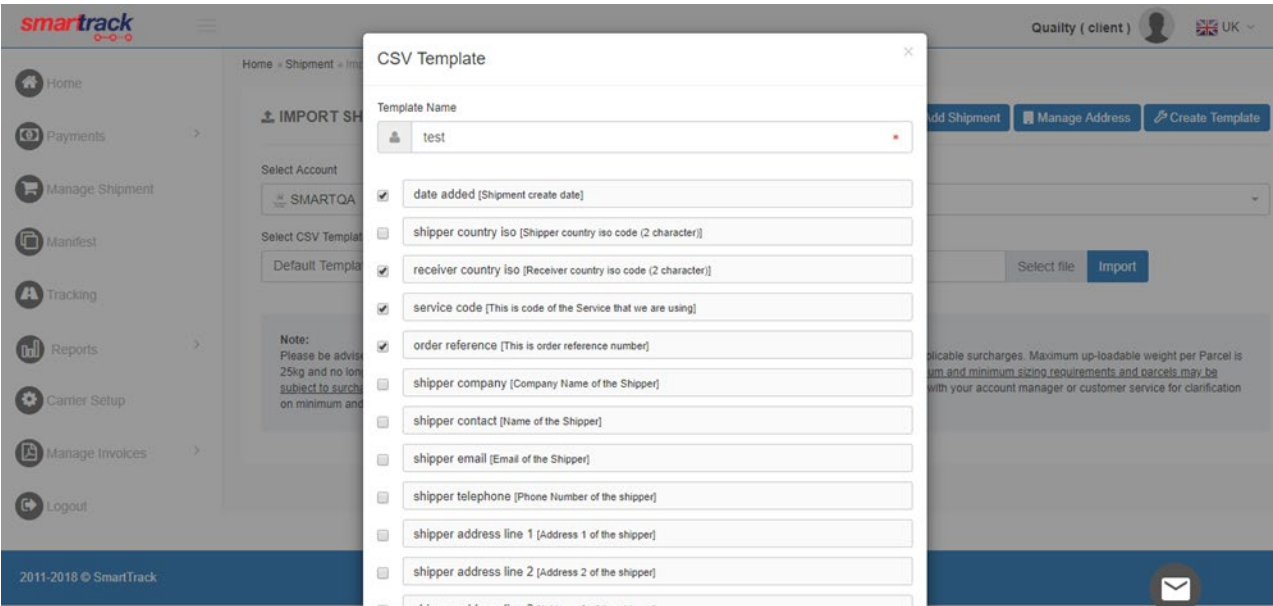

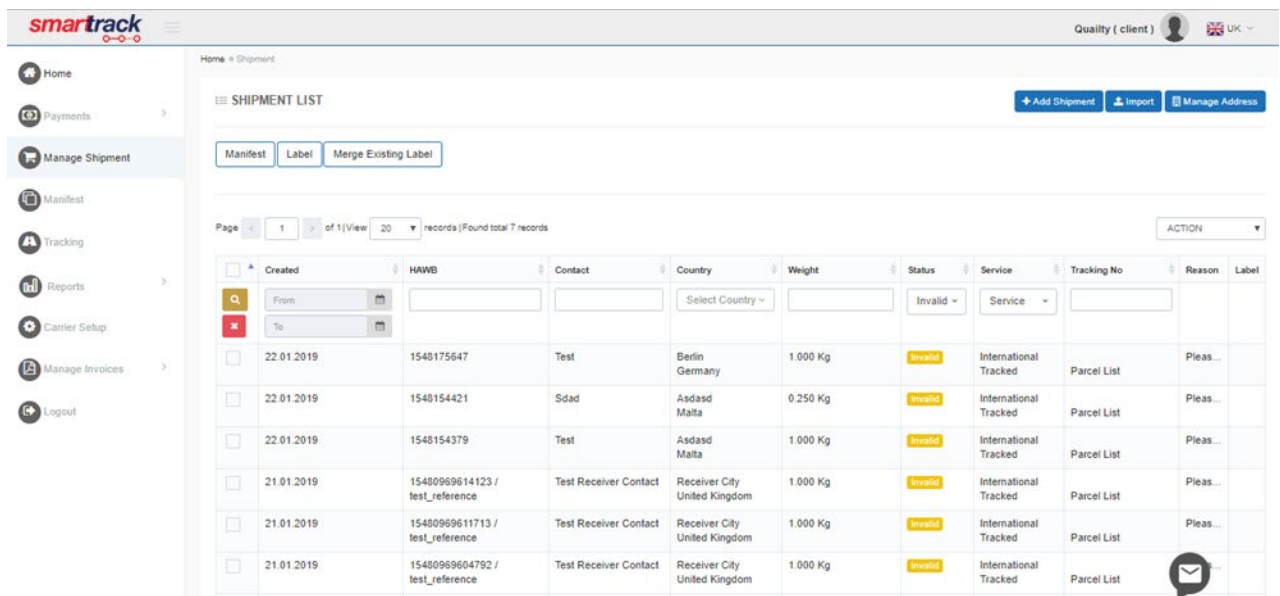

Figure 8-5 Custom template

8.4. Status of Shipments

Following are the statuses of shipments that depicts in which state user's shipment is:

8.4.1. Invalid

A shipment is invalid if there is any error but its HAWB number is created. It means user can remove that error and shipment will be available to deliver.

The screenshot shows the 'SHIPMENT LIST' page in the SmartTrack application. The page includes a sidebar with navigation options like Home, Payments, Manage Shipment, Manifest, Tracking, Reports, Carrier Setup, Manage Invoices, and Logout. The main content area displays a table of shipments, all of which are marked as 'Invalid'. The table has columns for Created, HAWB, Contact, Country, Weight, Status, Service, Tracking No, Reason, and Label. The 'Status' column for all rows shows 'Invalid' in a yellow box. The 'Reason' column contains truncated text like 'Pleas...'. Above the table, there are filters for 'From', 'To', and 'Country', and a 'Status' dropdown set to 'Invalid'. The table also includes a search bar and a 'View' dropdown set to '20'.

Created	HAWB	Contact	Country	Weight	Status	Service	Tracking No	Reason	Label
22.01.2019	1548175647	Test	Berlin Germany	1.000 Kg	Invalid	International Tracked	Parcel List	Pleas...	
22.01.2019	1548154421	Sdad	Asdasd Malta	0.250 Kg	Invalid	International Tracked	Parcel List	Pleas...	
22.01.2019	1548154379	Test	Asdasd Malta	1.000 Kg	Invalid	International Tracked	Parcel List	Pleas...

Figure 8-6 "Invalid" Shipments

8.4.2. Hold

User can hold any shipment if he doesn't want to deliver that parcel on the day. He can UN hold and send that shipment when feasible for him.

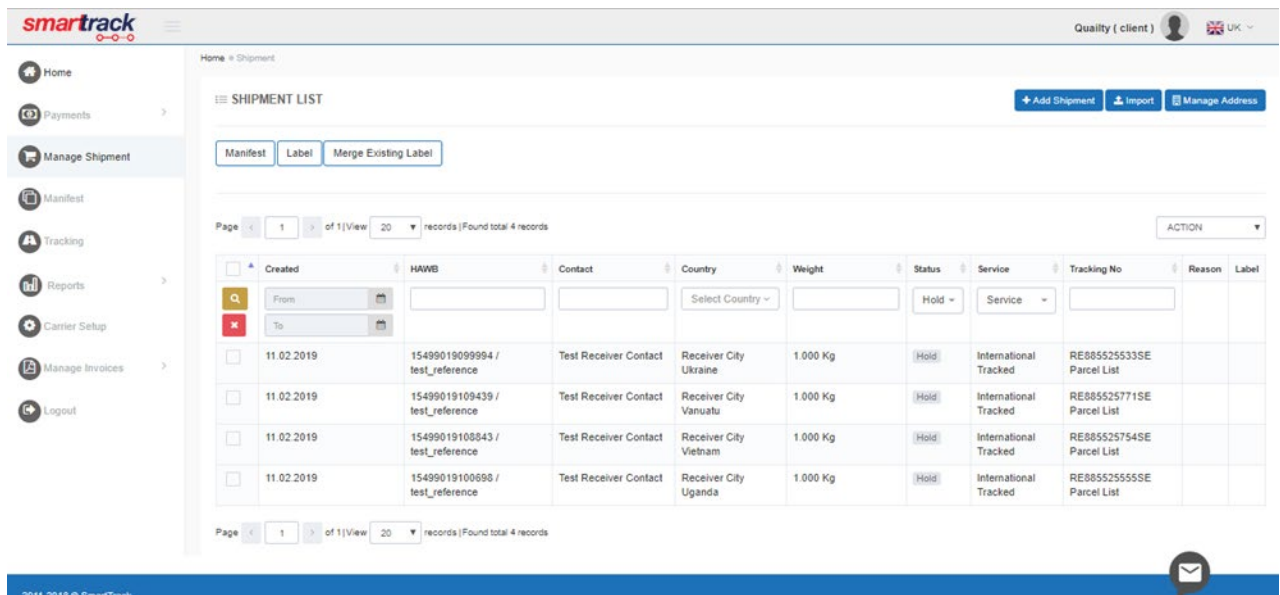

Figure 8-7 "Hold" Shipments

8.4.3. Deleted

User can delete any shipment if he had added any shipment but do NOT want that shipment to be delivered or if someone has cancelled that order.

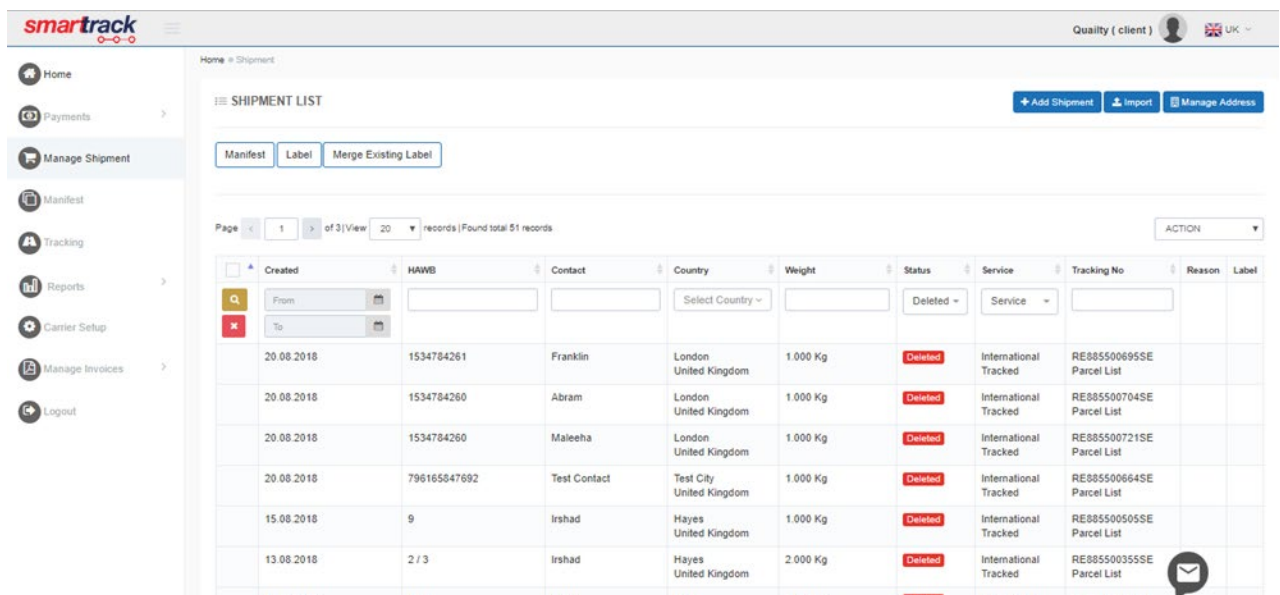

Figure 8-8 "Deleted" Shipments

8.4.4. Ready to Print

When user creates an accurate shipment, it is displayed in the list as a "Ready to Print" shipment. User can then generate its label to continue further process on it.

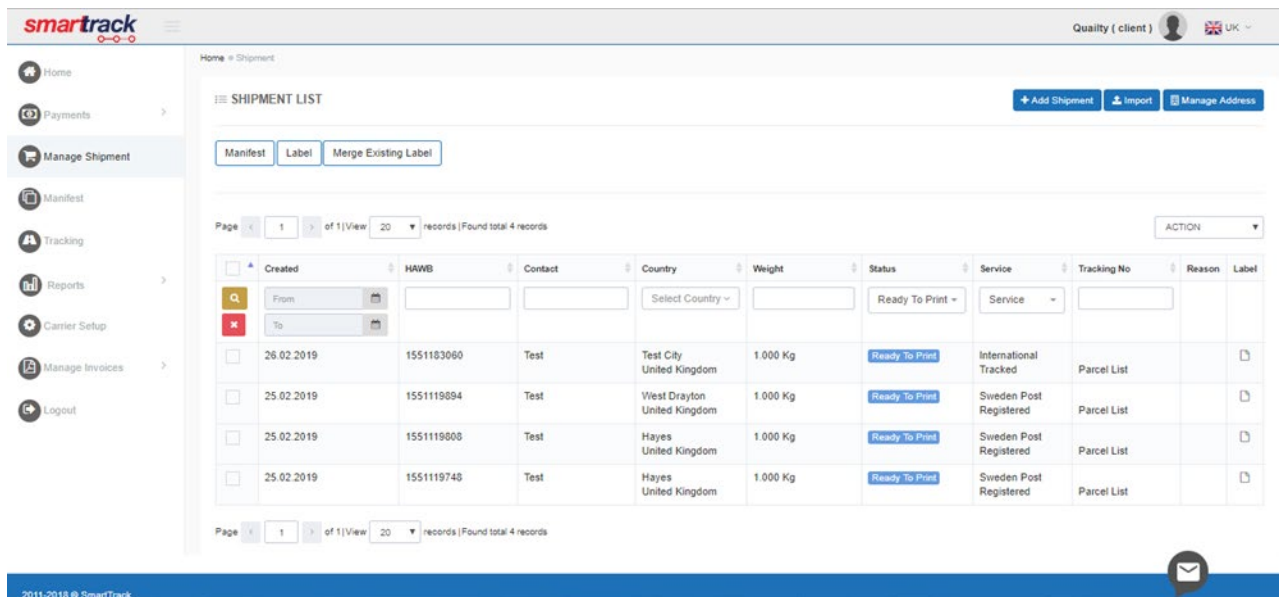

Figure 8-9 “Ready to Print” Shipments

8.4.5. Label Created

When user generates label of any shipment, its status changes to “Label Created” and it will be available to further process.

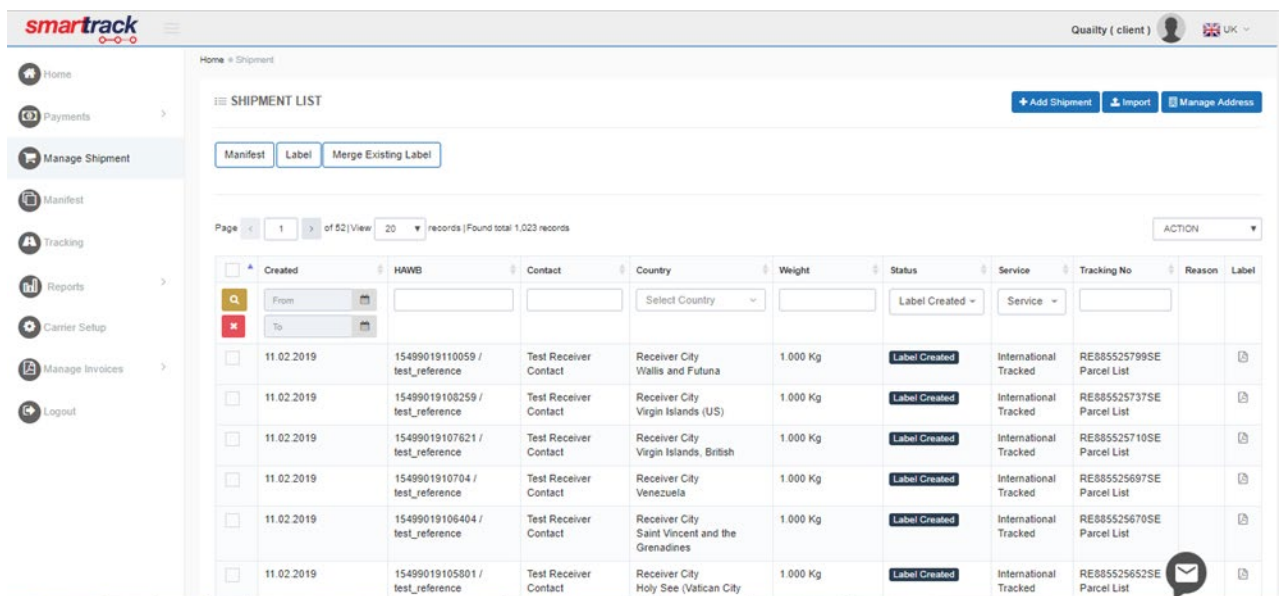

Figure 8-10 “Label Created” Shipments

8.4.6. Received

When OWE operational team receives any customer’s parcel, its status is changed to “Received”.

Figure 8-14 "Delivered" Shipments

8.4.10. Returned

If the destination is not found or any contact person do NOT receive the parcel, it is returned to the OWE Warehouse and its status is changed to “Returned”.

The screenshot displays the SmartTrack application interface. The top navigation bar includes the SmartTrack logo, a user profile for 'Developer (admin)', and a language selector set to 'UK'. The left sidebar contains a menu with options like Home, Find Waybill, Remote Areas, User, Accounts, Operation, Manage Warehouse, Permissions & Actions, Carriers, Department, Agents, Manage Shipment (selected), Manifest, Tracking, Reports, Integration, Carrier Setup, Help, Manage Invoices, Utilities, and Logout. The main content area is titled 'SHIPMENT LIST' and features buttons for '+ Add Shipment', 'Import', and 'Manage Address'. Below these are filters for 'Manifest', 'Label', and 'Merge Existing Label'. The shipment list table shows 4 records, all with a status of 'Returned'. A search bar and pagination controls are also visible.

Figure 8-16 “Closed” Shipments

8.5. Create Labels of Shipments

Users can create labels of shipments by following three ways:

- By clicking on icon displayed against each icon
- By clicking on “Label” button and selecting shipments that user want to create label and clicking on “Print Selected”
- By clicking on “Label” button and clicking on “Print All”.

By clicking “Print All’ button, all the shipments that are in “Ready to Print” status will be converted to “Label Created” status.

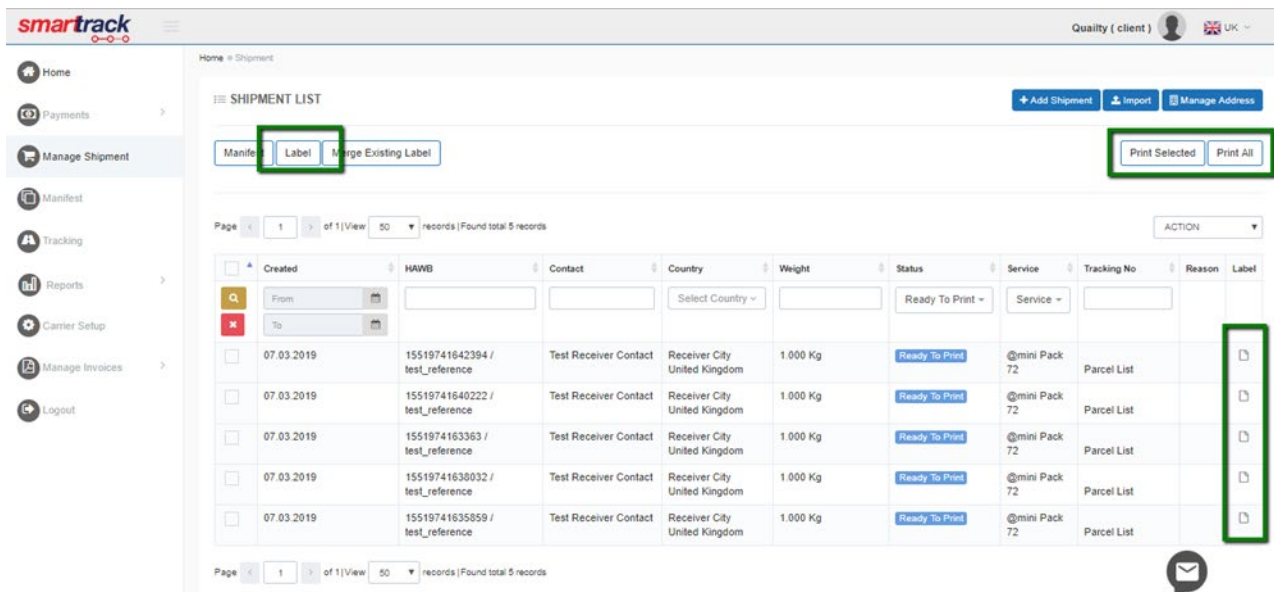

Figure 8-17 How to create labels of Shipments

8.6. Create Manifest of Shipments

Users can create manifest of shipments by following two ways:

- By clicking on “Manifest” button and selecting shipments that user want to manifest and clicking on “Manifest Selected”
- By clicking on “Manifest” button and clicking on “Manifest All”

By clicking “Print All” button, all the shipments that are in “Ready to Print” status will be converted to “Label Created” status.

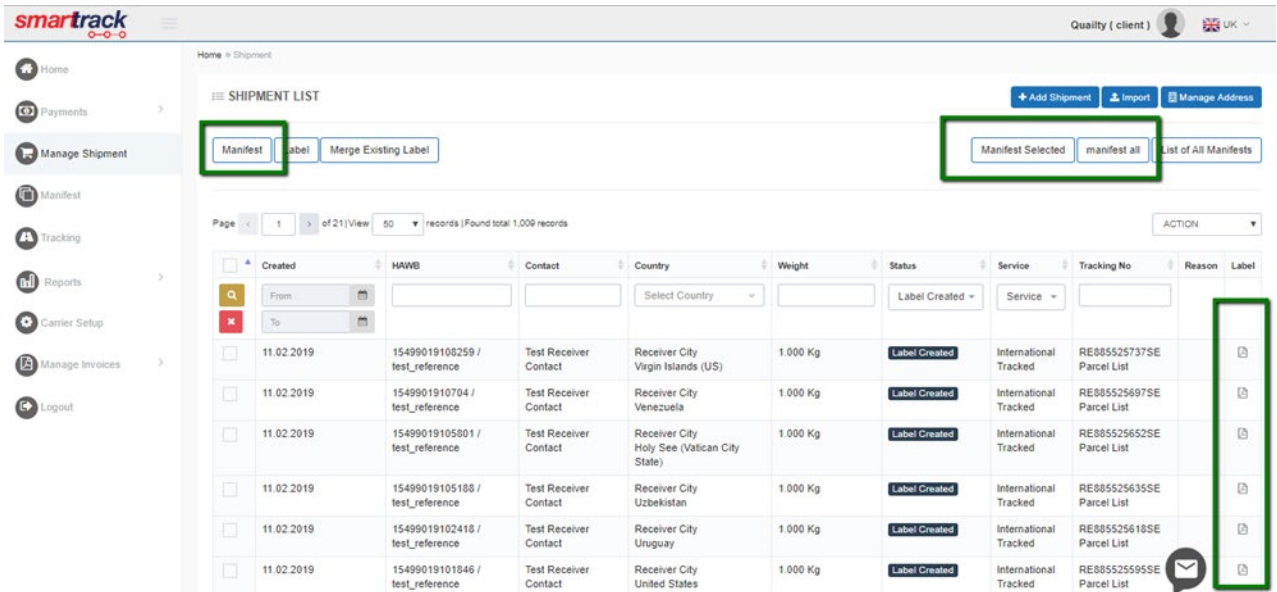

Figure 8-18 How to create Manifest of Shipments

After creating manifest, a list of all manifest reports are displayed in the list as shown in below figure.

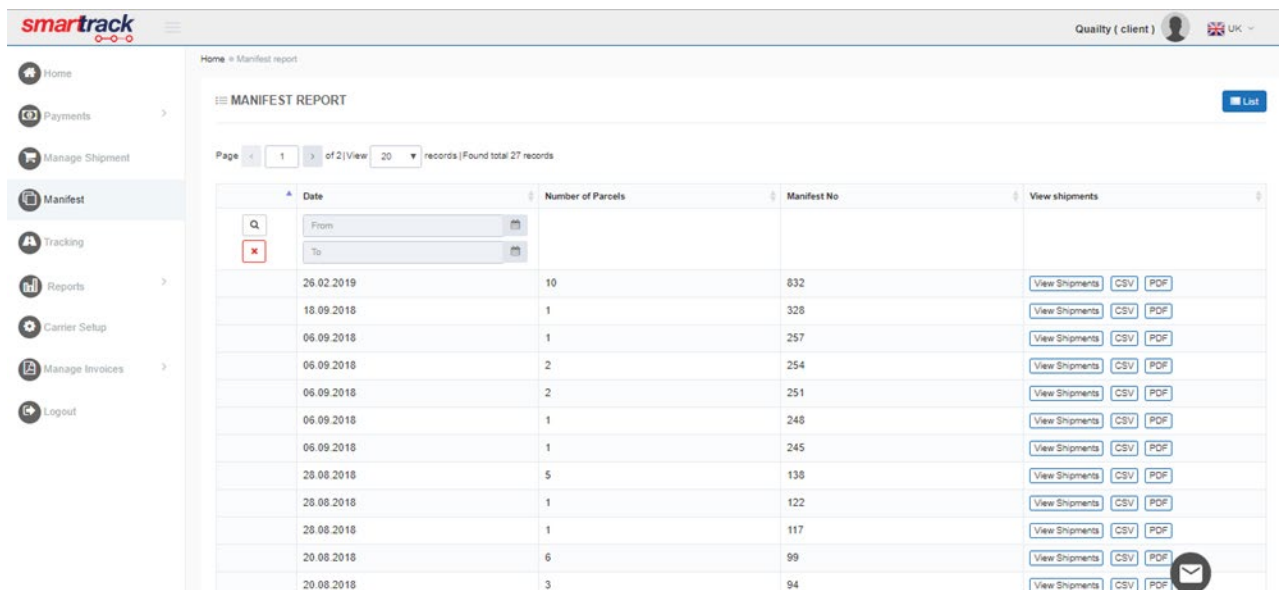

Figure 8-19 Manifest Report

8.7. How to Export, Delete, Hold, UN hold and Restore Shipments

User is able to Export, Delete, Hold, UN hold and Restore any shipment before its manifest is created. There are checkboxes present against each shipment to select and an action drop down to perform different actions like Export, Delete, Hold etc.

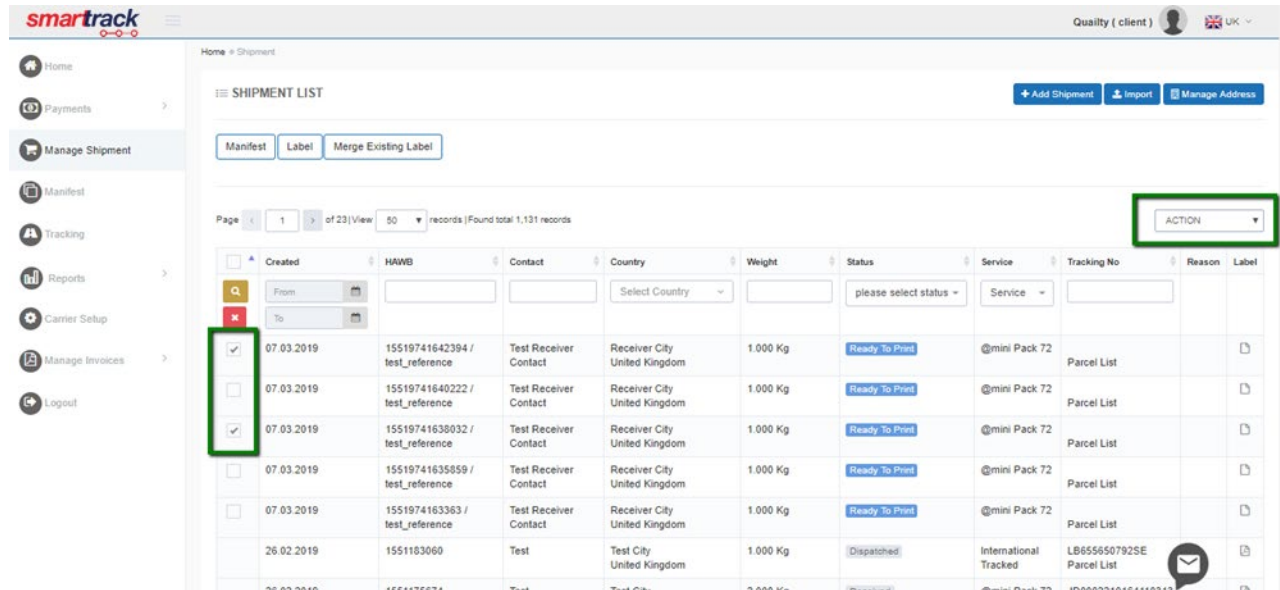

Figure 8-20 How to Export, Delete, Hold, UN hold, and Restore Shipments

8.8. How to Track any Shipment?

User is able to track its shipments as well. There are two ways to track a shipment.

- By clicking on the “Tracking No” displayed against each shipment
- By going to Tracking page and entering “Tracking No” of any shipment there.

Below figure displays single tracking of a shipment.

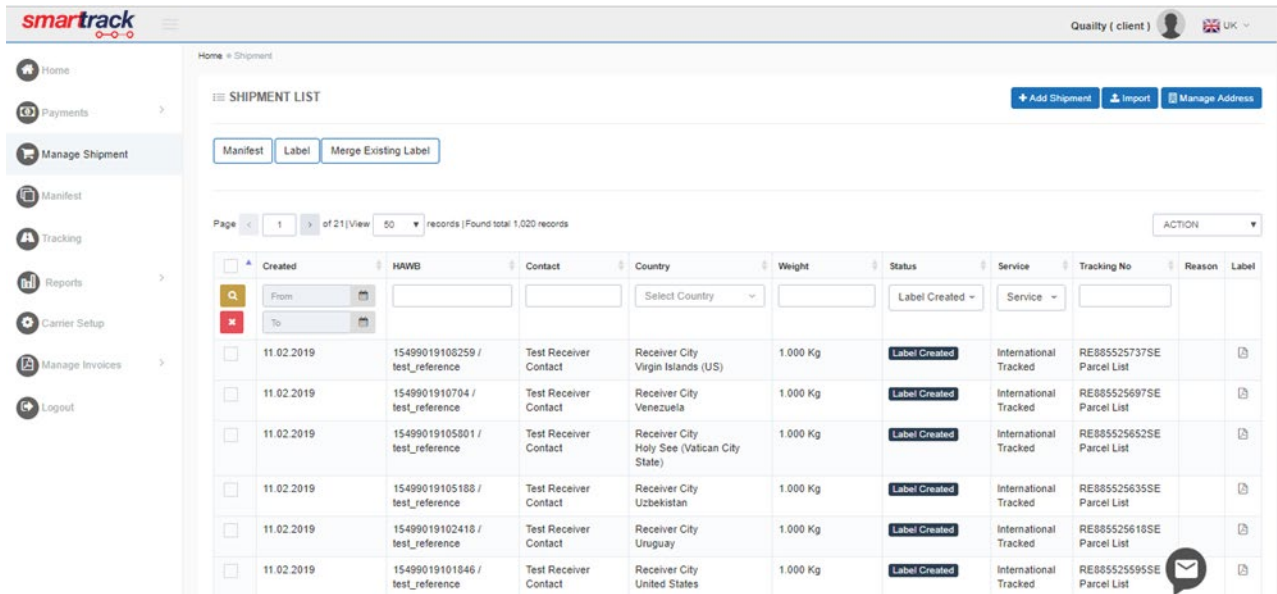

Figure 8-21 How to track single shipment

Below figure displays a multi-tracking shipment.

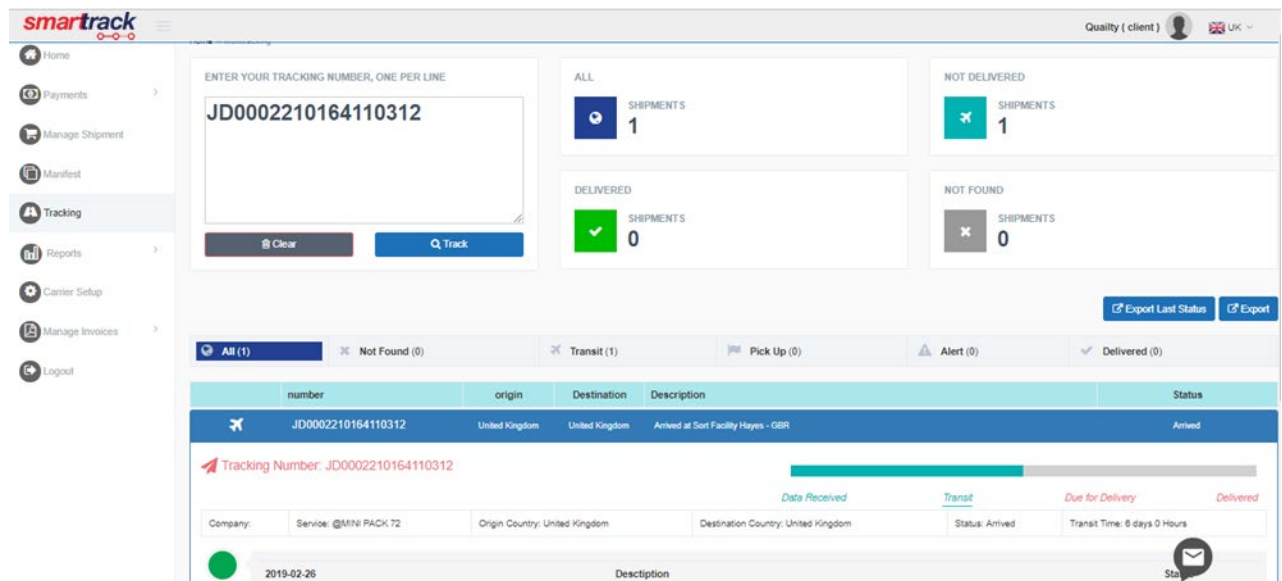

Figure 8-22 How to track multiple shipments

9. Manifest

User can view a list of all manifest reports displayed in the list as shown in below figure. User also have following access on this screen:

- View Shipments
- Download CSV
- Download PDF

By View Shipments, user is able to see all the shipments present in one manifest.

Date	Number of Parcels	Manifest No	View shipments
26.02.2019	10	832	View Shipments CSV PDF
18.09.2018	1	328	View Shipments CSV PDF

20.08.2018	6	99	View Shipments CSV PDF
20.08.2018	3	94	View Shipments CSV PDF

Figure 9-1 Manifest Report

10. Tracking

User is able to track its shipments as well. There are two ways to track a shipment.

- By clicking on the “Tracking No” displayed against each shipment
- By going to Tracking page and entering “Tracking No” of any shipment there.

Below figure displays a multi-tracking shipment. User can add as many tracking numbers as he want and can view its tracking by expanding its tracking number displayed at the screen.

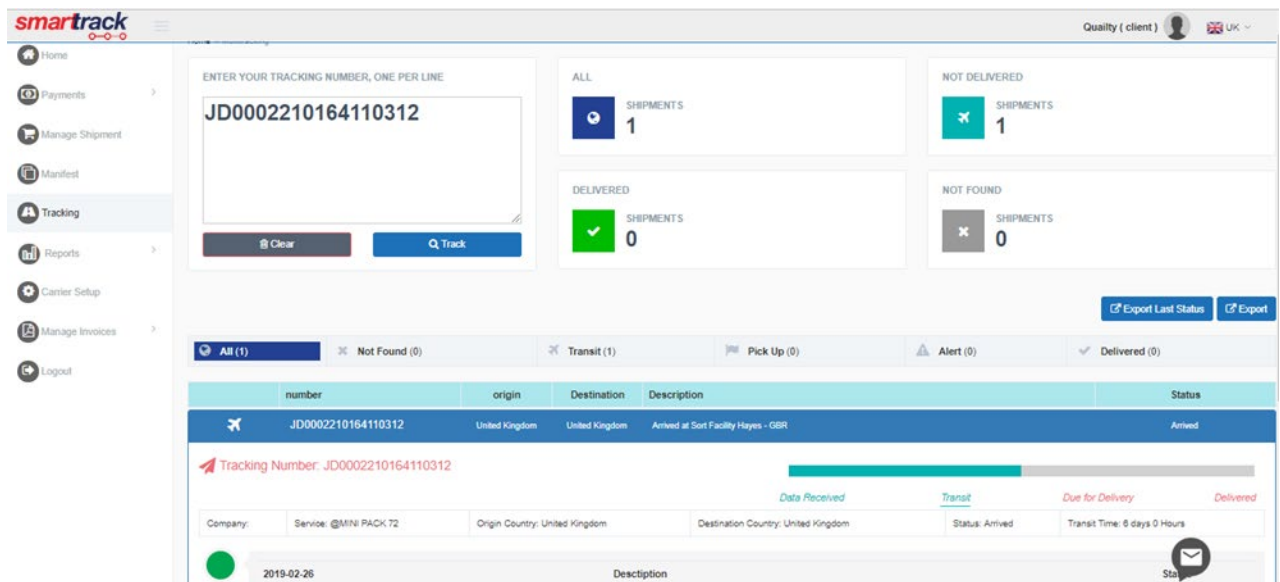

Figure 10-1 How to track multiple shipments

11. Carriers

Here is the list of carriers displayed that user can use to create shipments. This module is for “Super Admin” users. Only a Super Admin can add, update and delete carriers and its services. There are following two options displayed for Corporate User in Carriers tab as described below:

- Carrier Zones
- Tariffs List

11.1. Carrier Zones

The zones added to any carrier is listed here. User can add/update any carrier zone along with the countries he wants to add if available. User can name the zone on its own to remember and to search for the same zone instantly.

A list of tariffs along with their services and carriers is listed here. User is allowed to add new tariffs as well by clicking on “Add Tariff” button displayed at top of the screen. A list of tariffs is displayed in the figure given below.

The screenshot shows the SmartTrack Tariff List interface. The sidebar on the left contains various navigation options. The main content area displays a table of tariffs with the following columns: Actions, Carrier Name, Carrier Service, Tariff Name, From Zone, Start Date, End Date, Type, and Is Active. The table lists 37 records, with the first few rows showing tariffs for Yodel, DHL UK, BRT ITALY, and Aramex. A 'Download CSV' button and an 'Add Tariff' button are located at the top right of the table. A search bar and filters are also present at the top of the table.

Actions	Carrier Name	Carrier Service	Tariff Name	From Zone	Start Date	End Date	Type	Is Active
	Select Carrier	Select Services		Select From Zone			Select Type	Select Active
	Yodel		Test Tariffs manual		01 January 2018	01 March 2018	Customer	No
	Yodel		TAHIR_TEST_1		01 March 2018	31 March 2018	Customer	Yes

12. AGENTS

Smart Track (ST) provides a list of agents that delivers shipments. A list of agents is displayed in below figure.

The screenshot displays the SmartTrack web application interface for the 'AGENT LIST' section. The top navigation bar shows the user is logged in as 'Developer (admin)' with a UK flag. The left sidebar contains a menu with options like Home, Find Waybill, Remote Areas, User, Accounts, Operation, Manage Warehouse, Permissions & Actions, Carriers, Department, Agents, Manage Shipment, Manifest, Tracking, Reports, Integration, Carrier Setup, Help, Manage Invoices, Utilities, and Logout. The main content area is titled 'AGENT LIST' and includes a '+ Add New Agent' and 'Export' button. Below the title, there are filters for 'Select Agent Type', 'Select Country', and 'Select Active'. The table lists agents with columns: Action, Agent Type, Agent Code, Agent Name, Telephone, Country, and Active. The agents listed include OWE, PROFM, KAAB, HUX, Media, Imn, Orange, Yodel, Tahir, and Saqlain. A 'Tools' button is present next to each row. The interface also includes pagination controls showing 'Page 1 of 4' and 'Found total 69 records'.

Action	Agent Type	Agent Code	Agent Name	Telephone	Country	Active
	Carrier	OWE	One world express	00442088676060	United Kingdom	Yes

Figure 12-1 Agent List

12.1. Add New Agent

User can add new agent in the list by clicking on “Add New Agent” button displayed at top of agent list. Following is the screen from where user can add a new agent.

The screenshot displays the 'Add Agent' form in the SmartTrack application. The form is organized into two main sections: 'AGENT INFORMATION' and 'CONTACT DETAILS'. In the 'AGENT INFORMATION' section, there are input fields for 'Agent Type' (a dropdown menu), 'Agent Code', 'Agent Name', and a 'Status' toggle switch currently set to 'No'. Below these is an 'Agent Logo' section with a 'Select file' button and a note about recommended logo dimensions (254 x 62). The 'CONTACT DETAILS' section includes fields for 'Contact Name', 'Address Line 1', 'Address Line 2', 'Address Line 3', 'City', 'Country' (a dropdown menu), 'Postcode', 'Telephone', and 'Mobile'. A 'Remark (Notes and important relevant Information):' text area is located at the bottom of the form. The form has 'Save' and 'Cancel' buttons at the bottom right. The left sidebar contains a list of navigation options: Home, Find Waybill, Remote Areas, User, Accounts, Operation, Manage Warehouse, Permissions & Actions, Carriers, Department, Agents, Manage Shipment, Manifest, Tracking, Reports, Integration, Carrier Setup, Help, Manage Invoices, Utilities, and Logout. The top header shows the SmartTrack logo and the user 'Developer (admin)' with a UK flag.

Figure 12-2 Add New Agent

User is able to perform following actions on agents added in the list.

- View an Agent
- Edit an Agent
- Delete an Agent

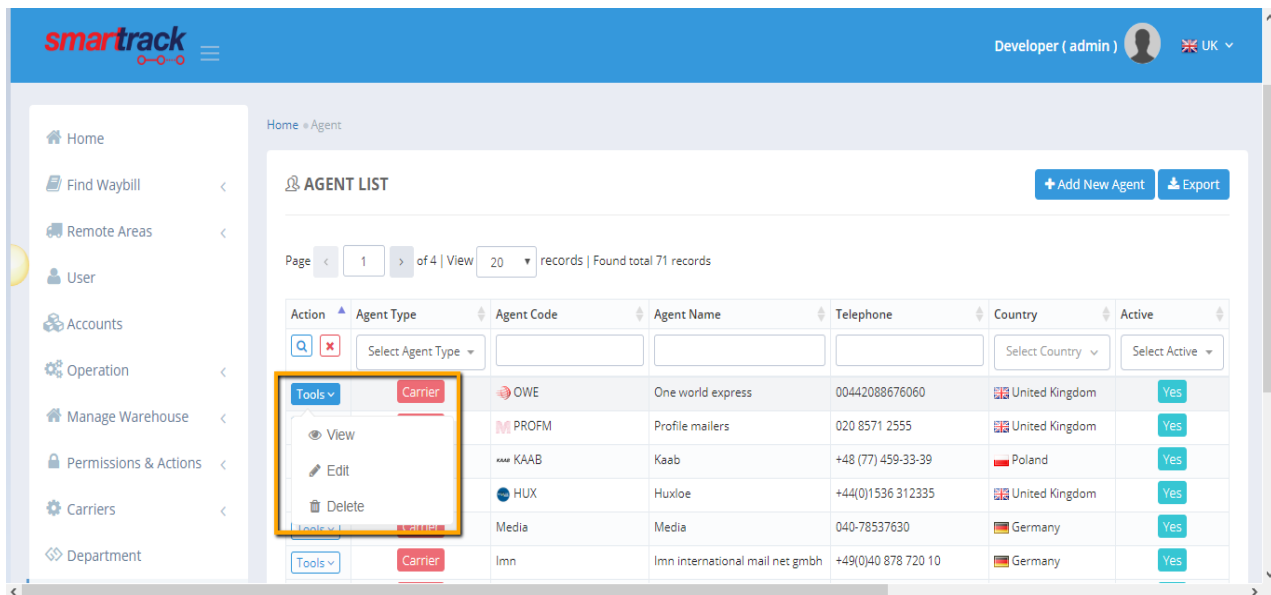

Figure 12-3 Actions on Agents List

12.2. View an Agent

User can view the information added against any agent from “View” link displayed in the action drop down.

13. CARRIER SETUP

Carrier setup is the screen where user can see the carriers that are associated to his account. User need to accept terms and conditions to use that carrier. There are two tabs displayed in Carrier Setup screen as follows:

- Carrier Selection
- Contracts

13.1. Carrier Selection

Below is shown the screen of Carrier setup. This is “Carrier Selection” tab.

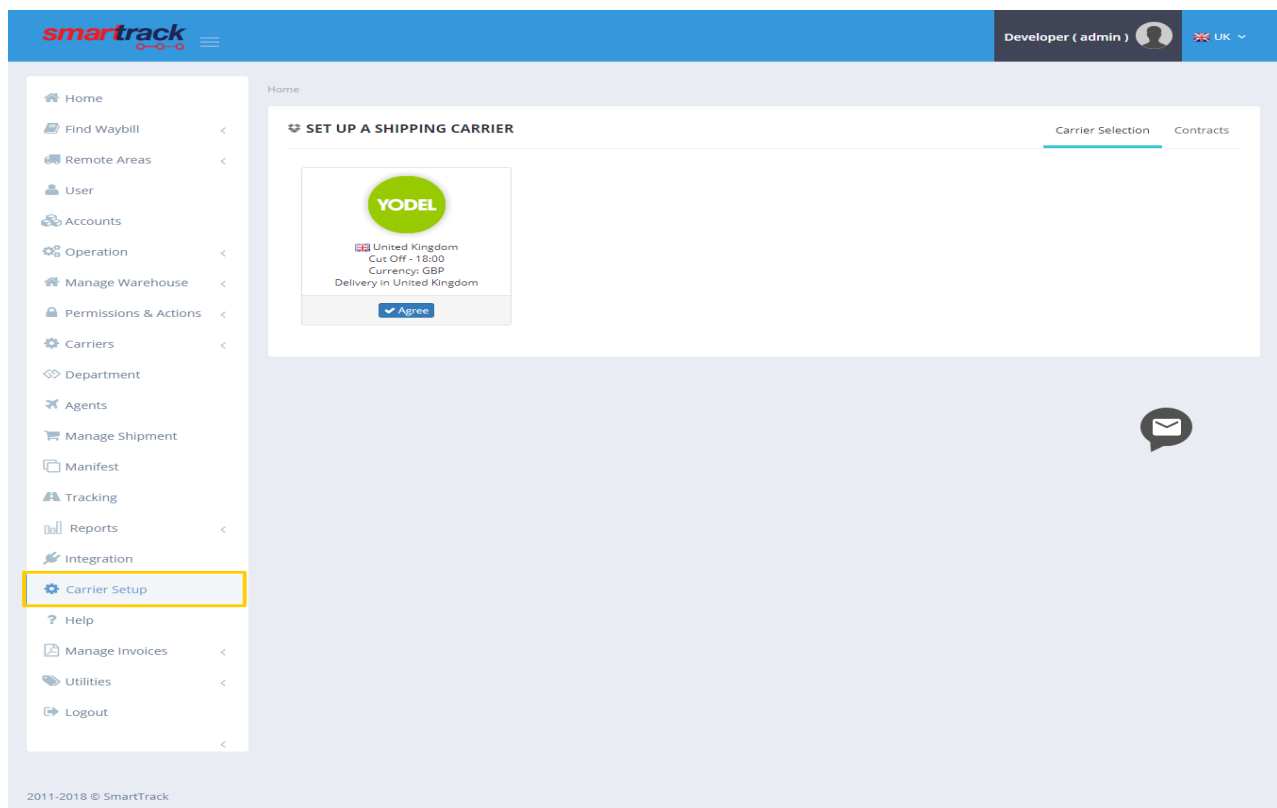

Figure 13-1 Carrier Setup

User need to click on “Agree” button displayed in carrier tile to use its services. After, user clicks on Agree,

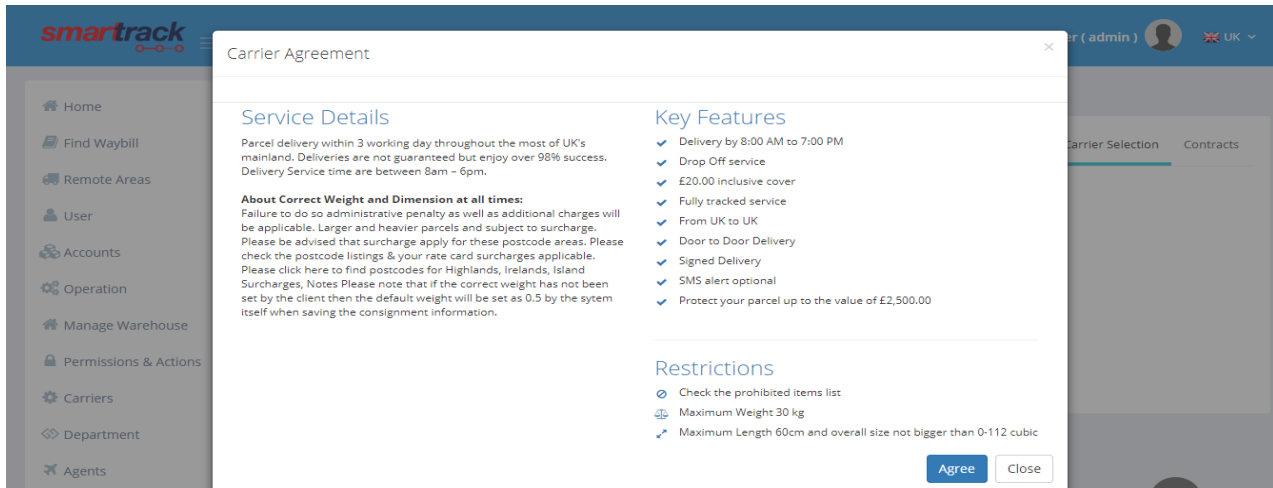

Figure 13-2 Terms & Conditions of carrier

User clicks on Agree to accept terms & conditions of this specific carrier. After clicking on Agree user will be able to use its services and an “Active” label is appeared on that carrier as displayed below.

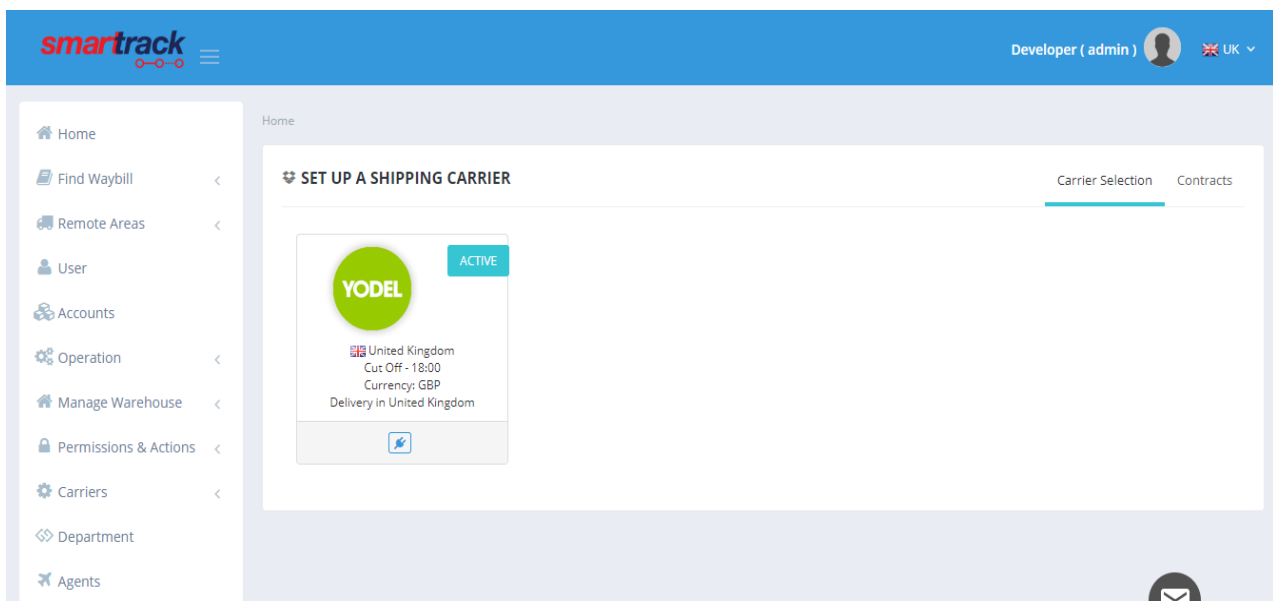

Figure 13-3 Agreed/Active Carriers

13.2. Contracts

User can also add his own “Contracts” in this list by clicking on “Contracts” tab displayed at top of the screen.

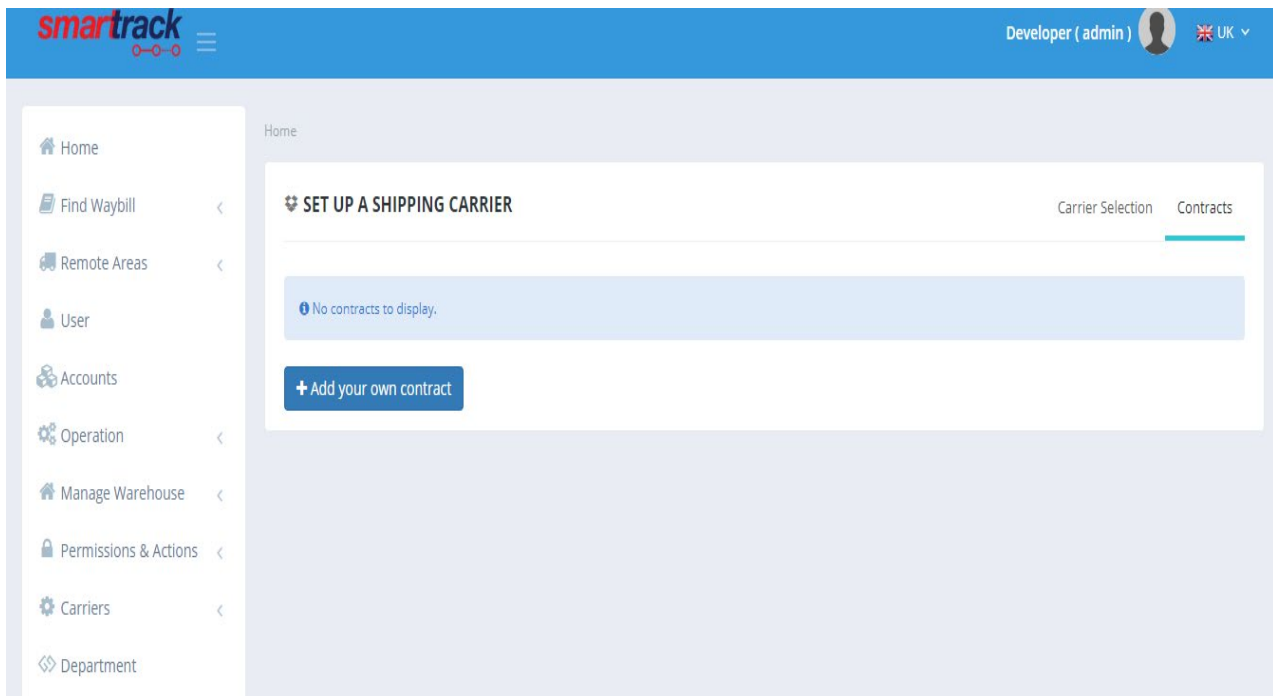

Figure 13-4 Contracts Screen

User will click on “Add your own contract” button and a new screen is displayed as shown below to add a contract.

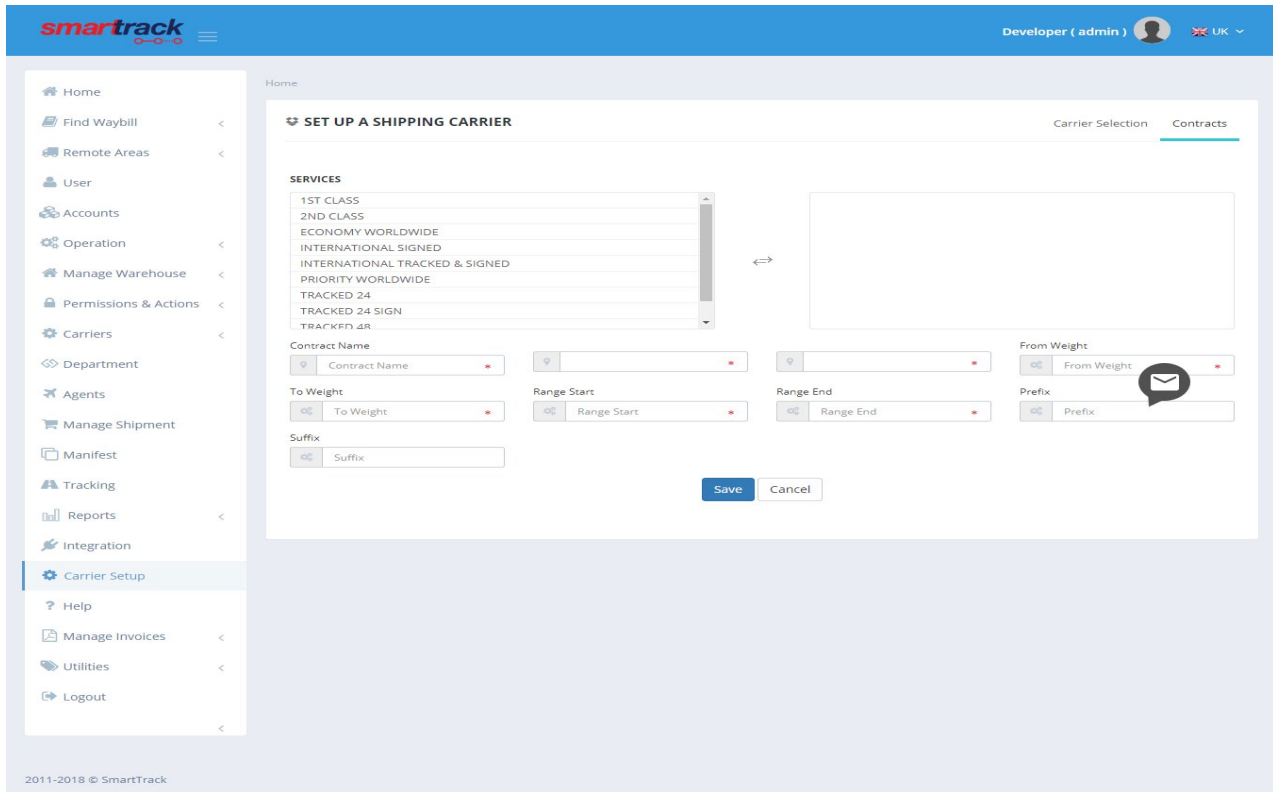

Figure 13-5 Add Own Contract Screen

The added contract's carrier is displayed in Carrier Selection tab.

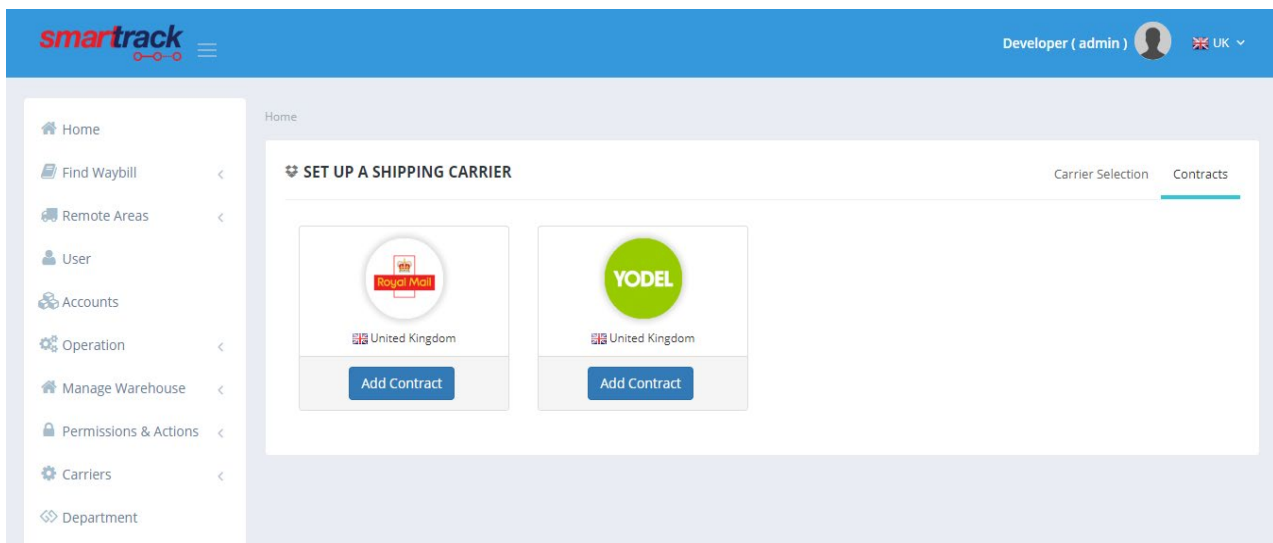

Figure 13-6 Added Contracts in the list

When user has added a new contract, it will be listed in the “Contracts” tab as shown below.

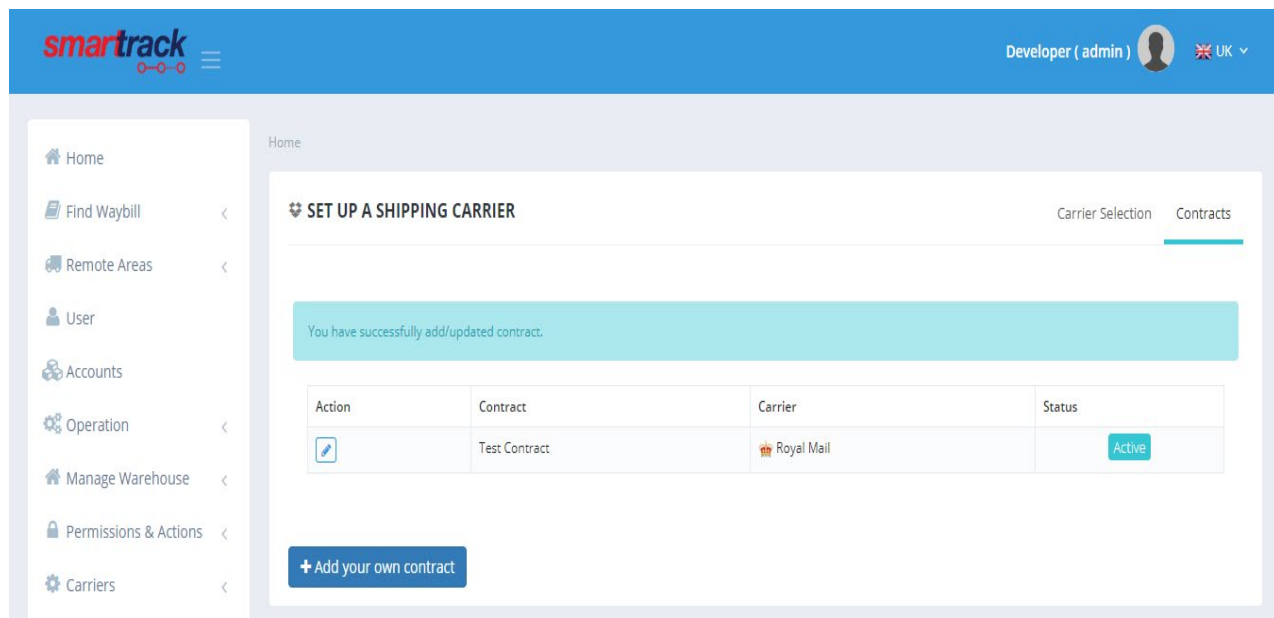

Figure 13-7 Own Contract Added in the Carrier Setup

14. Manage Invoices

System will provide a list of invoices to pay for user that have been generated by Parent account. Invoices are listed along with Invoice Number, Invoice Date, Created Date, Amount, VAT (if applicable), status of invoice and Generated by.

14.1. Invoice List

User can view all auto invoices generated by the system in this screen. There are two types of invoices

- Sale Invoices
- Purchase Invoice

14.1.1. Sale Invoices

All the invoices that user has generated to its child accounts will be listed here along with its Invoice number, invoice date, created date, Account number, Net Amount, Vat, Total Amount, Is paid and Generated by columns.

User can **cancel** the most recent invoice and re-generate it from find waybill screen if there is any changes required. User can also pay the invoice from “Pay Now” button displayed in “Tools” drop down. A new popup is displayed where user can change the date of paying and can select a method of payment from the following:

- Cash
- Bank Transfer
- Cheque

Once user has clicked on “Pay Now”, amount of invoice will be deducted from his account and a request will be generated to its parent account under “Pending Payments” screen to approve the payment. When parent account will approve its payment its status will be changed to Paid.

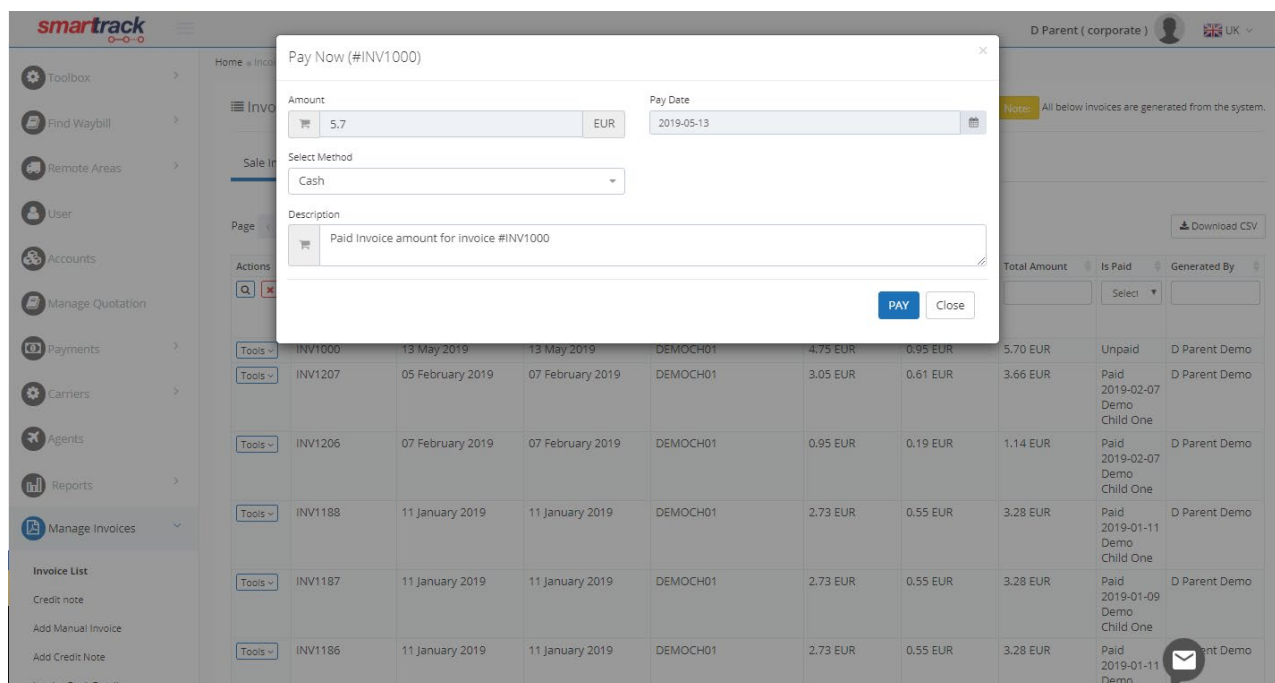

Figure 14-2 Pay Now

User can download CSV from the screen as well.

14.1.2. Purchase Invoices

All the invoices that are generated to this account/user will be listed in Purchase Invoices tab. Columns of the invoices will be same as of sales invoices. User can download csv and pdf file and can pay the invoices generated against his own account.

User can generate a manual invoice by selecting any account he want to generate invoice to; under its account and enter hawb number of any shipment to whom he is going to generate manual invoice. Total amount of that shipment and weight along with other details will be listed in the fields shown. When user clicks on “Save Changes”, a manual invoice is generated and will be listed in Manual Invoices screen.

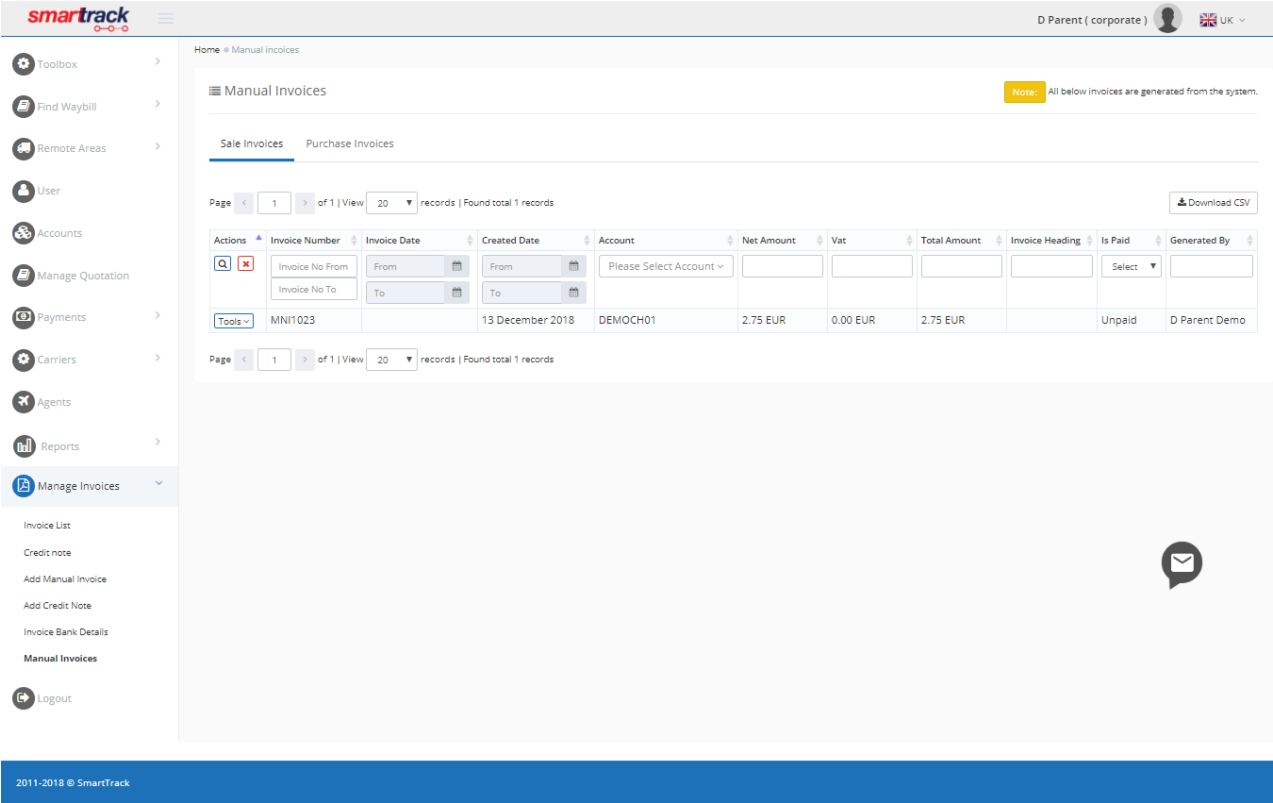

Figure 14-4 Add Manual Invoice

14.2.2. Sales Manual Invoices

All the invoices that user has generated to its child accounts will be listed here along with its Invoice number, invoice date, created date, Account number, Net Amount, Vat, Total Amount, Is paid and Generated by columns. The only difference between invoices and manual invoices is that Manual invoices are those that are generated by user itself and auto invoices are those that are generated by the system through find waybill screen where tariffs are automatically applied to shipments.
