1. LOGIN SCREEN

Operation's user can login to the system by using [URL:https://www.smarttrack.co//login.php]. Following screen will be displayed to the user to enter login credentials.

- Username
- Password

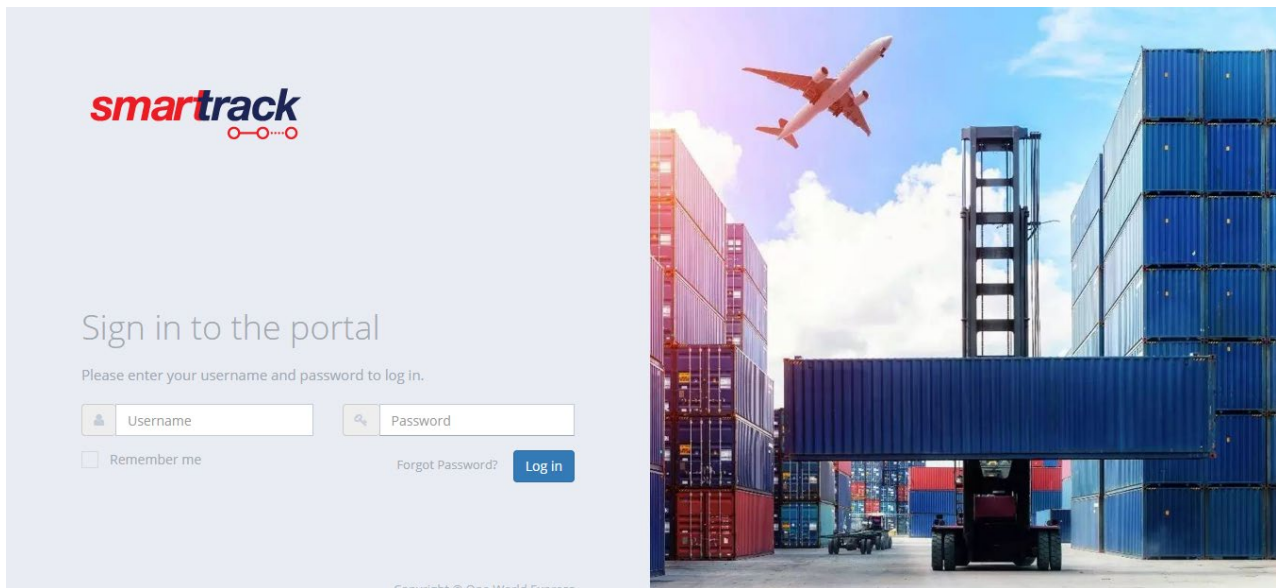

Figure 1-1 user panel Access Information

2. DASHBOARD

When user login to the system with valid credentials, system redirects user to Dashboard as shown below. There are 4 tiles displayed at top of the screen that represents

- Total Parcel Scanned
- Total Current User Scanned
- Total Dispatched Manifests
- Upcoming Client's Manifest

Following these tiles are four graphs displayed that are:

- Service Scanned Graph
- User Scanned Graph

- Upcoming Manifest Graph
- Dispatched Manifests Graph

User is able to see graphs on Daily, Weekly and Monthly basis for each of the graph.

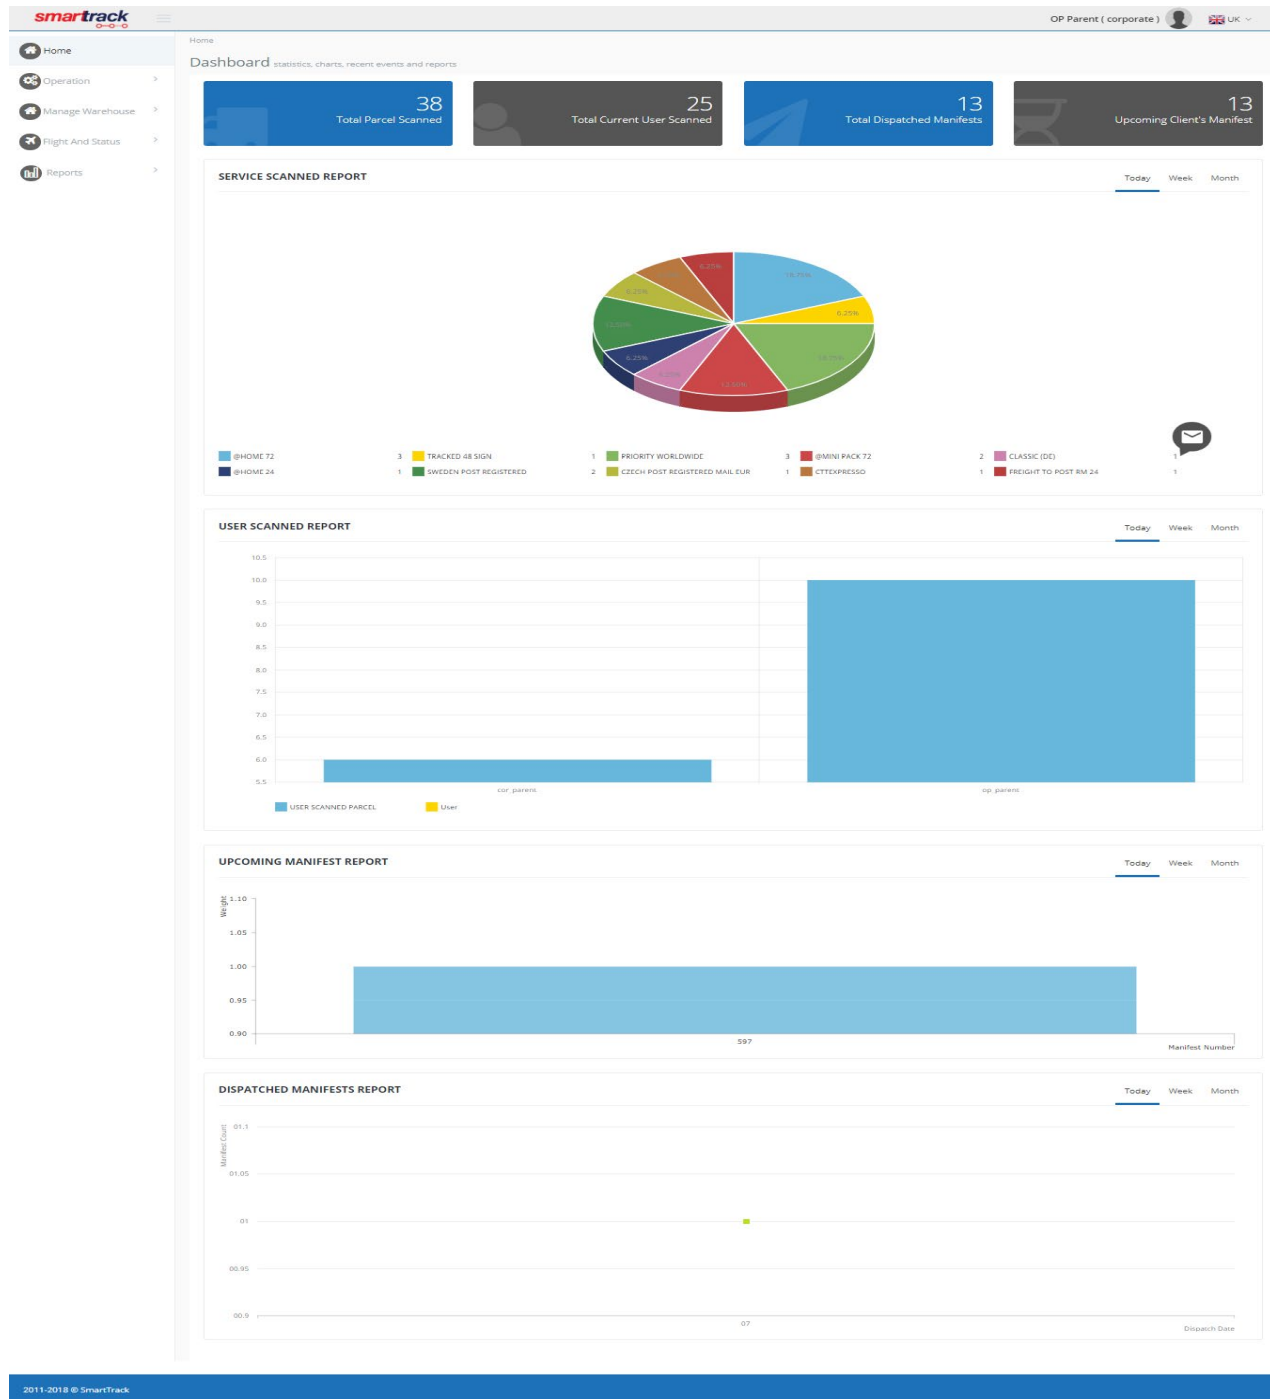

Figure 2-1 Operation's Dashboard

User is able to click on any of the tiles to see details.

By clicking on Total Parcel Scanned tile, user is redirected to the list of all parcel scanned by this user as shown in below screenshot:

Figure 2-5 Upcoming Client's Manifest

3. OPERATIONS

User can navigate to operations module by clicking on Operation tab displayed in navigation panel. There are following functionalities shown in operation modules:

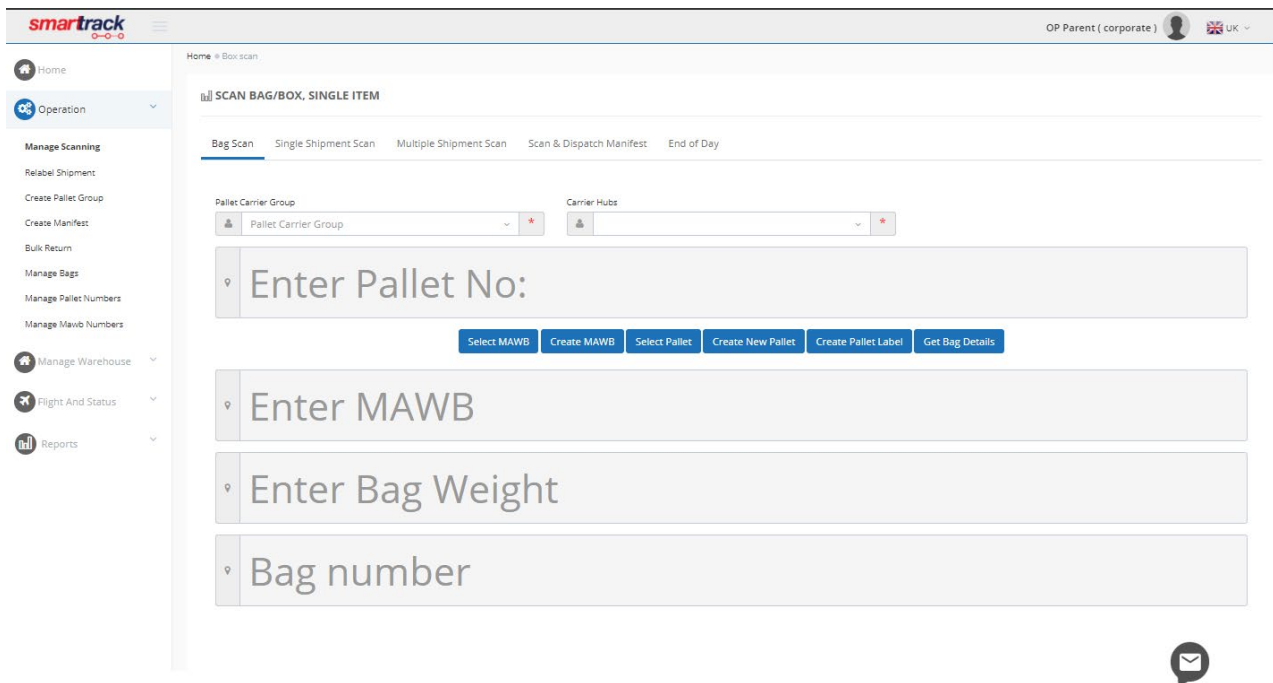

- Manage Scanning
- Relabel Shipment
- Create Pallet Group
- Create Manifest
- Bulk Return
- Manage Bags
- Manage Pallet Numbers
- Manage Mawb Numbers

3.1 Manage Scanning

3.1.1 Bag Scan

Operational user can scan parcels and/or shipments through this screen. First tab is to scan a Bag in a Pallet as shown in the screenshot below. User can add a bag in a pallet number and can assigned a mawb number to it as well.

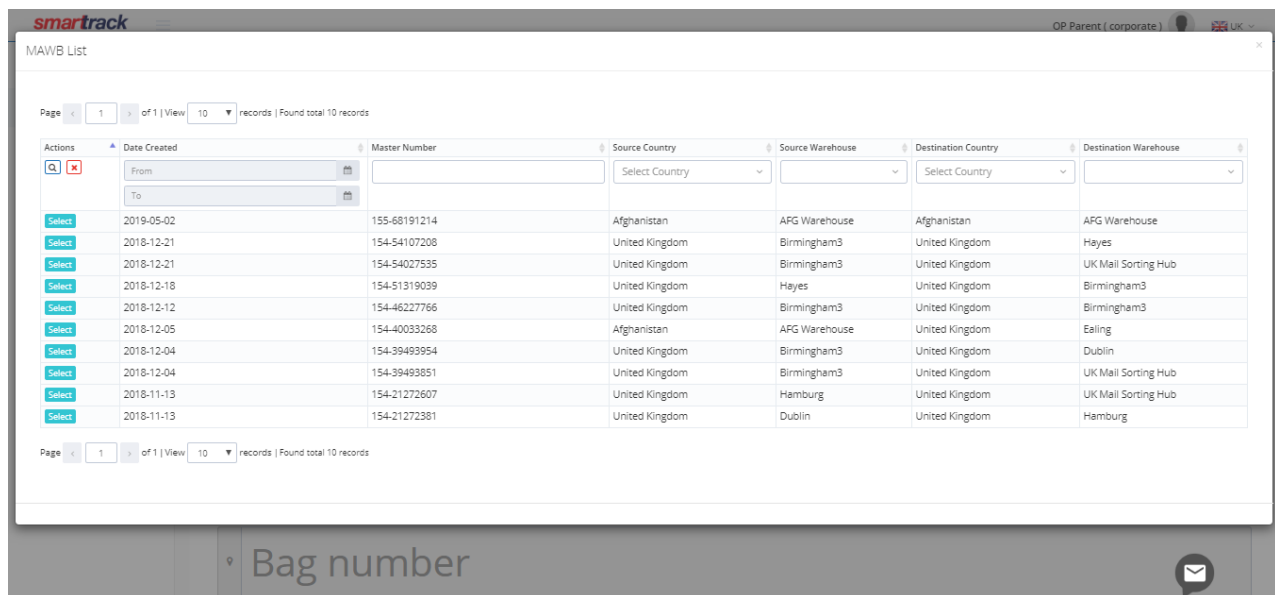

Note: User can add multiple bags in a pallet and/or single bag in multiple pallets.

The screenshot shows the 'SCAN BAG/BOX, SINGLE ITEM' interface in the SmartTrack system. The left sidebar contains navigation links for Home, Operation, Manage Scanning, Relabel Shipment, Create Pallet Group, Create Manifest, Bulk Return, Manage Bags, Manage Pallet Numbers, Manage Mawb Numbers, Manage Warehouse, Flight And Status, and Reports. The main area has tabs for Bag Scan, Single Shipment Scan, Multiple Shipment Scan, Scan & Dispatch Manifest, and End of Day. Below the tabs are dropdowns for 'Pallet Carrier Group' and 'Carrier Hubs'. The central form contains four input fields: 'Enter Pallet No:', 'Enter MAWB', 'Enter Bag Weight', and 'Bag number'. Below the 'Enter Pallet No:' field are buttons for 'Select MAWB', 'Create MAWB', 'Select Pallet', 'Create New Pallet', 'Create Pallet Label', and 'Get Bag Details'. A chat icon is visible in the bottom right corner.

Figure 3-1 Bag Scan screen

User can select mawb number from existing list as shown below

The screenshot shows a 'MAWB List' window with a table of Master Air Waybill (MAWB) records. The table has columns for Actions, Date Created, Master Number, Source Country, Source Warehouse, Destination Country, and Destination Warehouse. Each row has a 'Select' button in the Actions column. The table is paginated, showing 10 records out of 10 total records.

Actions	Date Created	Master Number	Source Country	Source Warehouse	Destination Country	Destination Warehouse

Figure 3-2 Select Mawb list

User can also add mawb number by clicking on “Create MAWB” button as shown below

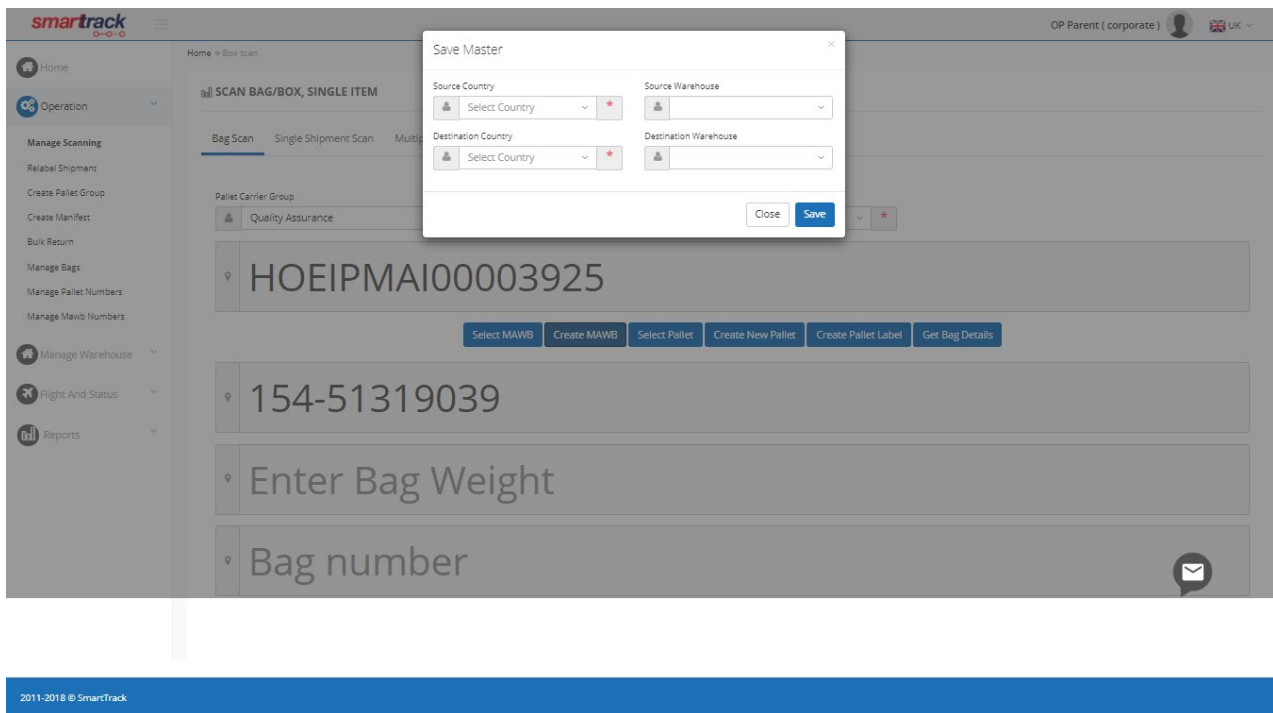

Figure 3-3 Create Mawb Number

User can select Pallet number from existing list as shown below

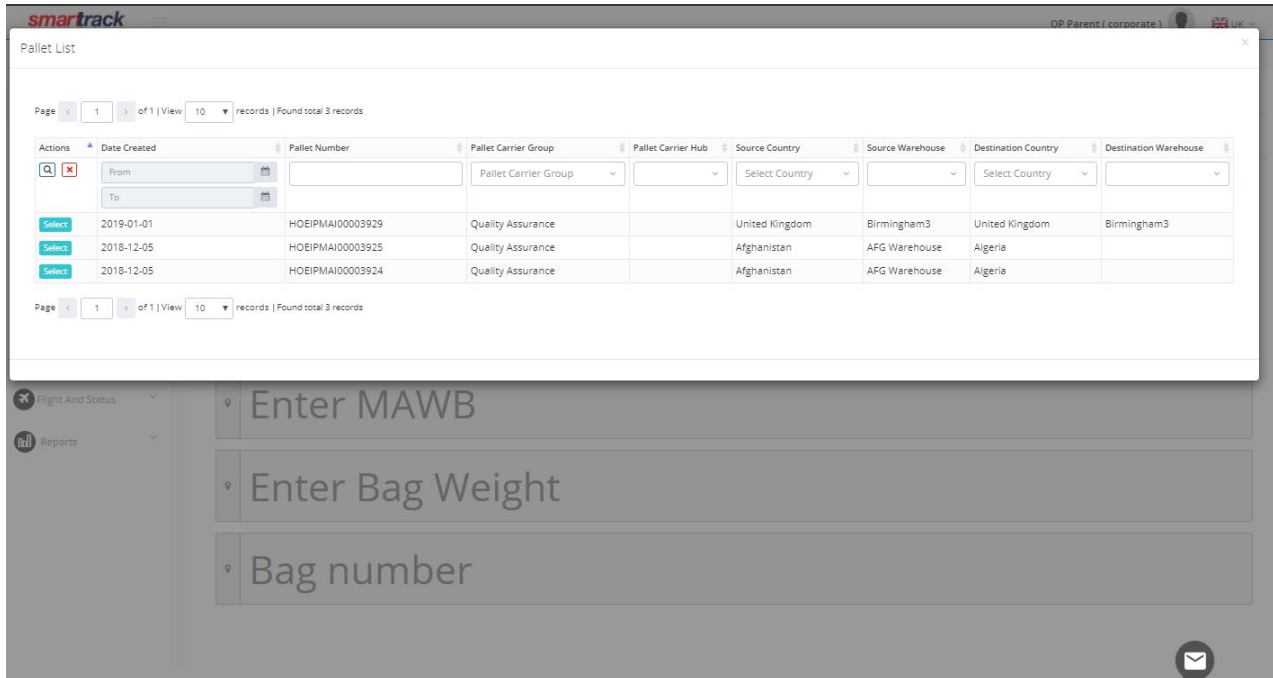

Figure 3-4 Select Pallet Number

User can also add Pallet number by clicking on “Create Pallet” button as shown below

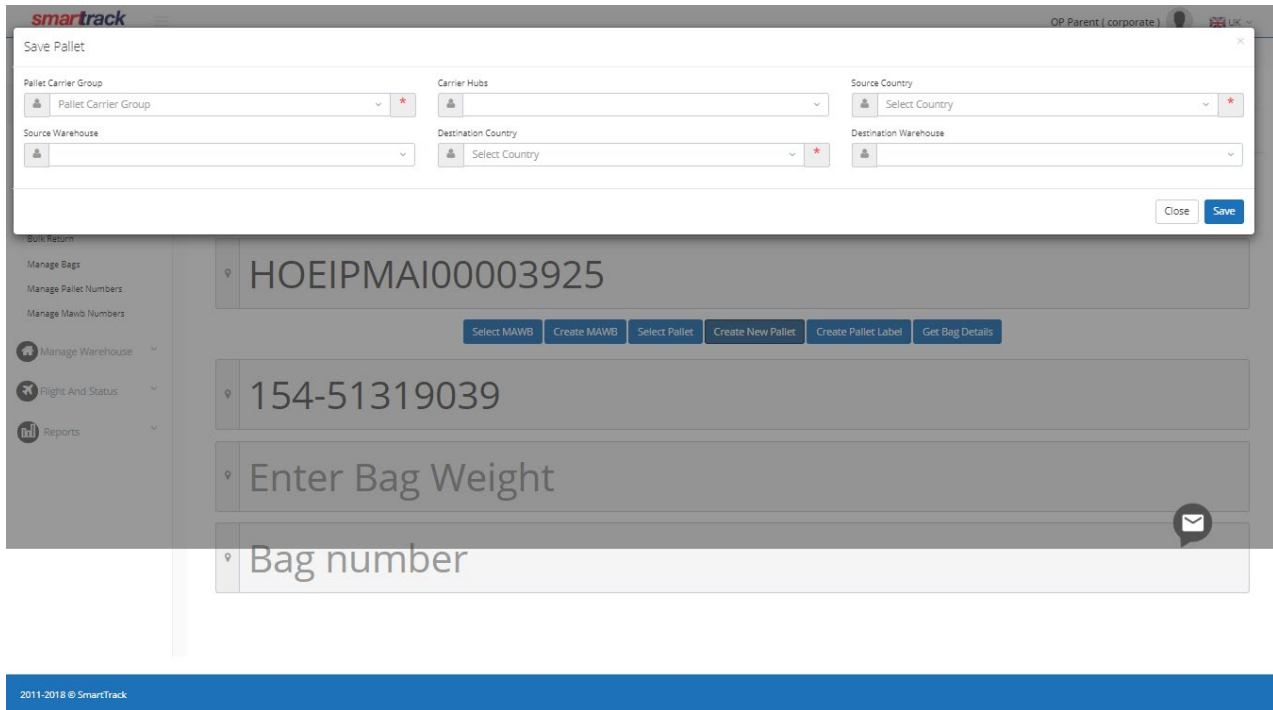

Figure 3-5 Create Pallet Number

User can create Pallet label by clicking on “Create Pallet Label” button shown in bag scan screen

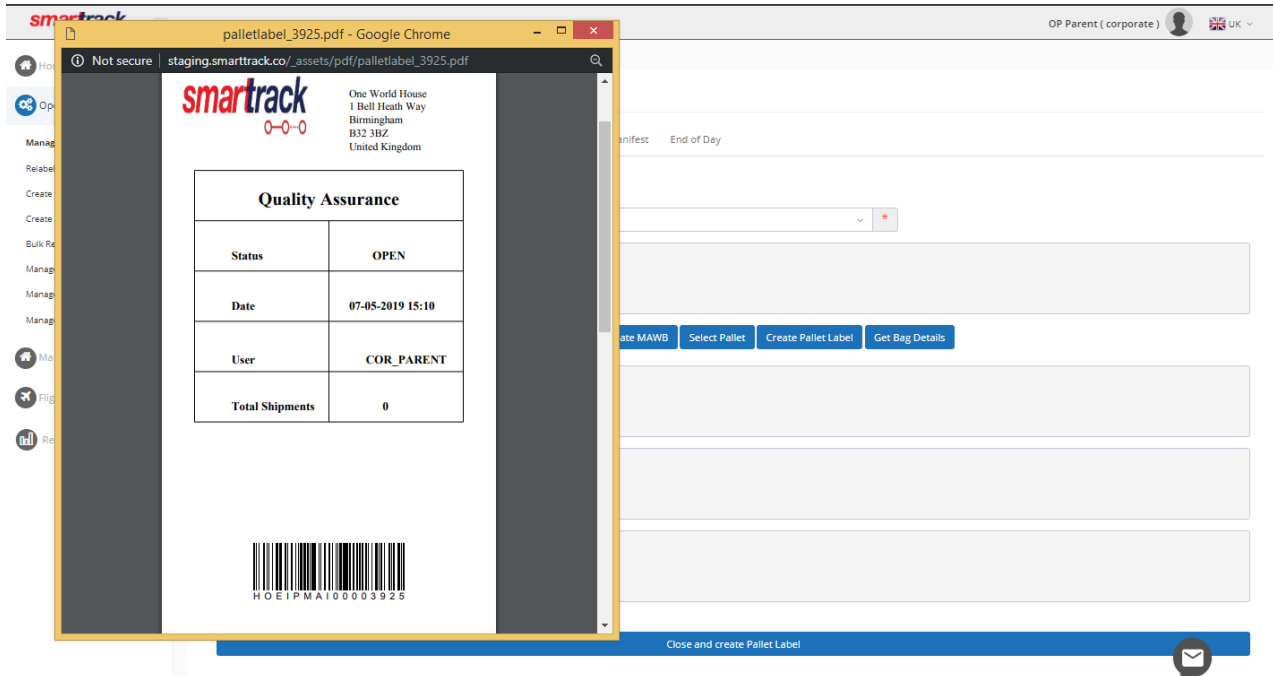

Figure 3-6 Create Pallet Label

User can get bag details added in a pallet number by clicking on “Get Bag Details” button

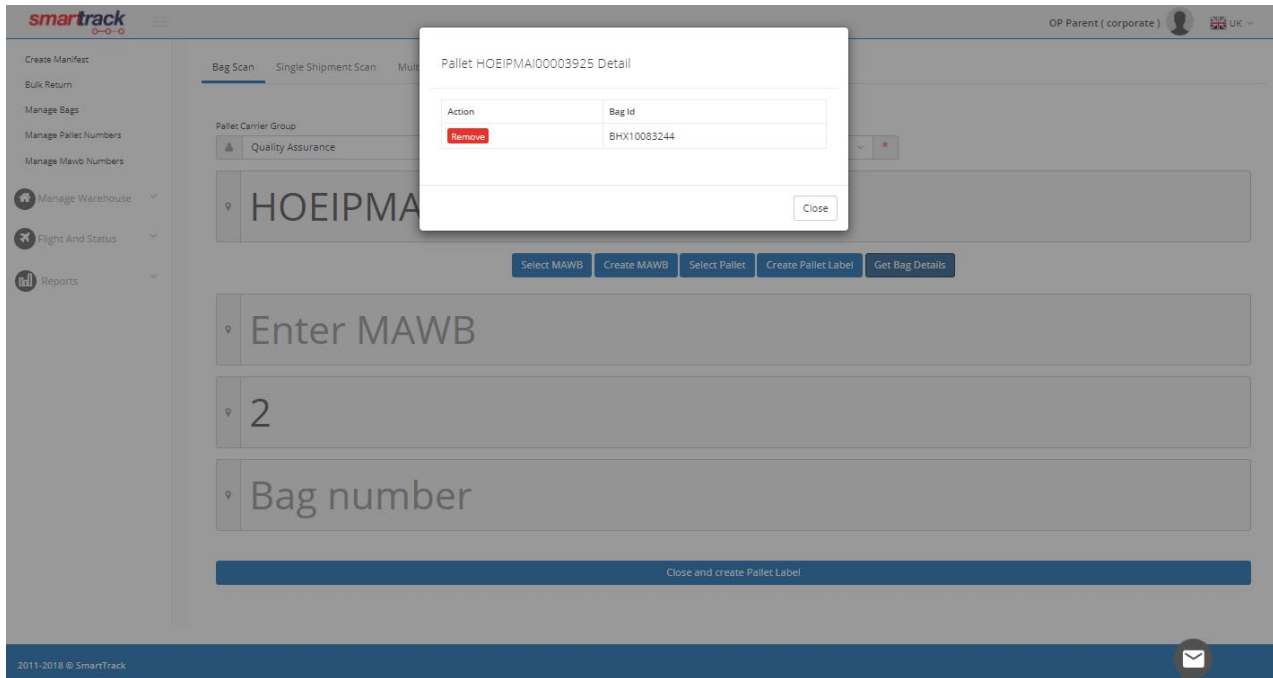

Figure 3-7 Get Bag Details

3.1.2 Single Shipment Scan

User can scan single shipment by adding its tracking number and mawb number. User can also add/update its dimensions and weight as well. User can also use same dims for all shipments if the dims are same.

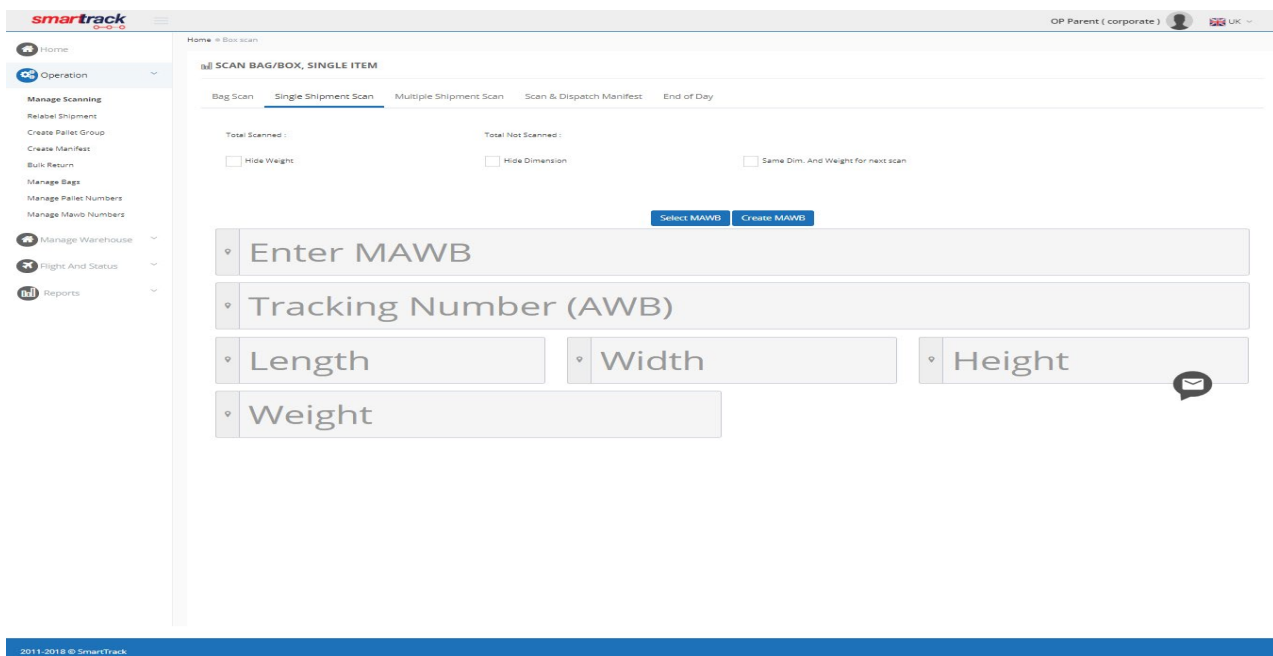

Figure 3-8 Single Shipment Scan

3.1.3 Multiple Shipment Scan

User can scan multiple shipment by adding their tracking numbers. There are 3 options to scan multiple parcels as follows:

- Scan
- Pre-Sort
- Outbound

3.1.3.1 Scan

User can scan multiple parcels in a bag against mawb number from this screen.

The screenshot shows the 'Multiple Shipment Scan' interface in the SmartTrack system. The top navigation bar includes the 'smarttrack' logo, a user profile for 'OP Parent (corporate)', and a language dropdown set to 'UK'. The left sidebar contains a menu with 'Home' and 'Operation' (expanded) with sub-items: 'Manage Scanning' (Relabel Shipment, Create Pallet Group, Create Manifest, Bulk Return, Manage Bags, Manage Pallet Numbers, Manage Mawb Numbers), 'Manage Warehouse', 'Flight And Status', and 'Reports'. The main content area is titled 'SCAN BAG/BOX, SINGLE ITEM' and has tabs for 'Bag Scan', 'Single Shipment Scan', 'Multiple Shipment Scan' (selected), 'Scan & Dispatch Manifest', and 'End of Day'. Below the tabs are three radio buttons: 'Scan' (selected), 'Pre-Sort', and 'Outbound'. There are two buttons: 'Select MAWB' and 'Create MAWB'. The form has two main input fields: 'Enter MAWB' and 'Bag/Reference Number:'. Below these is a table with a header 'Enter Parcel Number' and several empty rows for data entry. A chat icon is visible in the bottom right corner.

Figure 3-9 Multiple Shipment Scan – Scan

3.1.3.2 Pre-Sort

User can add parcels in a pre-sorted bag through this screen. All the parcels should be of same Hub that is selected in the screen.

Figure 3-9 Multiple Shipment Scan – Pre-Sort

3.1.3.3 Outbound

User can scan parcels in two types of bags from this screen.

Two types of bags are:

- Pre-Sorted
- Mix

3.1.4.1 Pre-sorted Bags

In Pre-sorted bag, the parcels; user is going to scan must be of same service.

3.1.4.2 Mix Bags

In mix bag, the parcels; user is going to scan can be of different services.

Figure 3-10 Multiple Shipment Scan – Outbound

3.1.4 Scan & Dispatch Manifest

User can scan client's manifest from this screen. All the parcels added in the manifest will be scanned automatically in it.

Figure 3-11 Scan & Dispatch Manifest

3.1.5 End of Day

Operation user can manifest all the shipments of services that are scanned earlier by this user. He can also dispatch when all the requirements are fulfilled and shipment is ready to dispatch for receiver address. User can also send an email to inform the responsible persons about the activity.

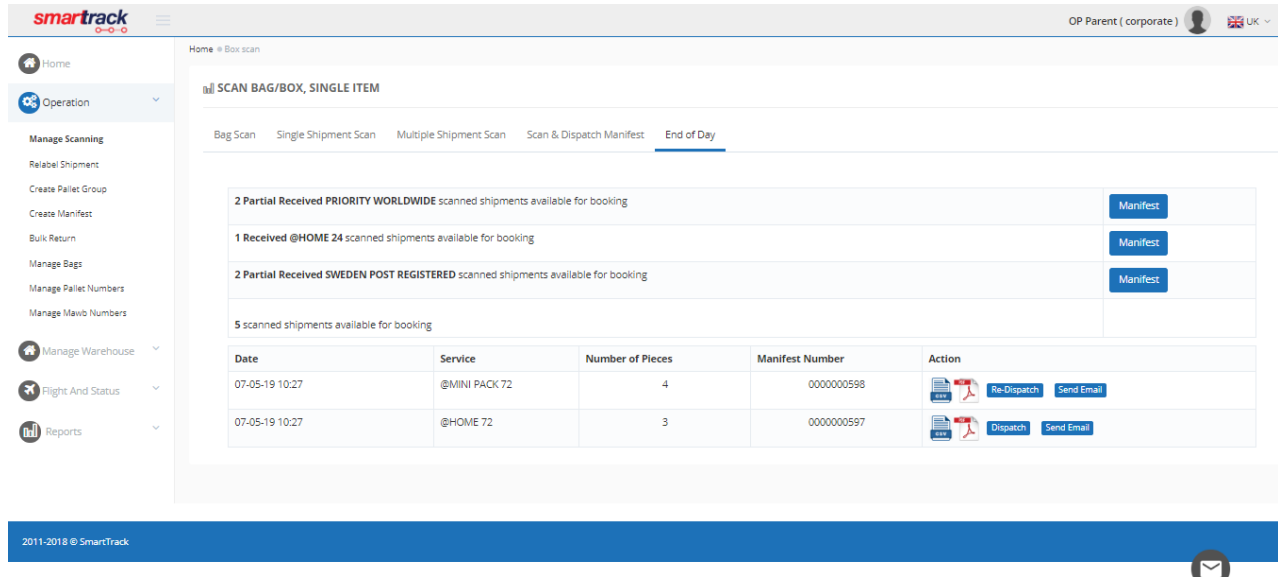

Figure 3-12 End of the Day

User can add Dispatch Agent, Services, Weight, Master no (MAWB), currency and no of parcels while dispatching any service at the end of the day as shown below

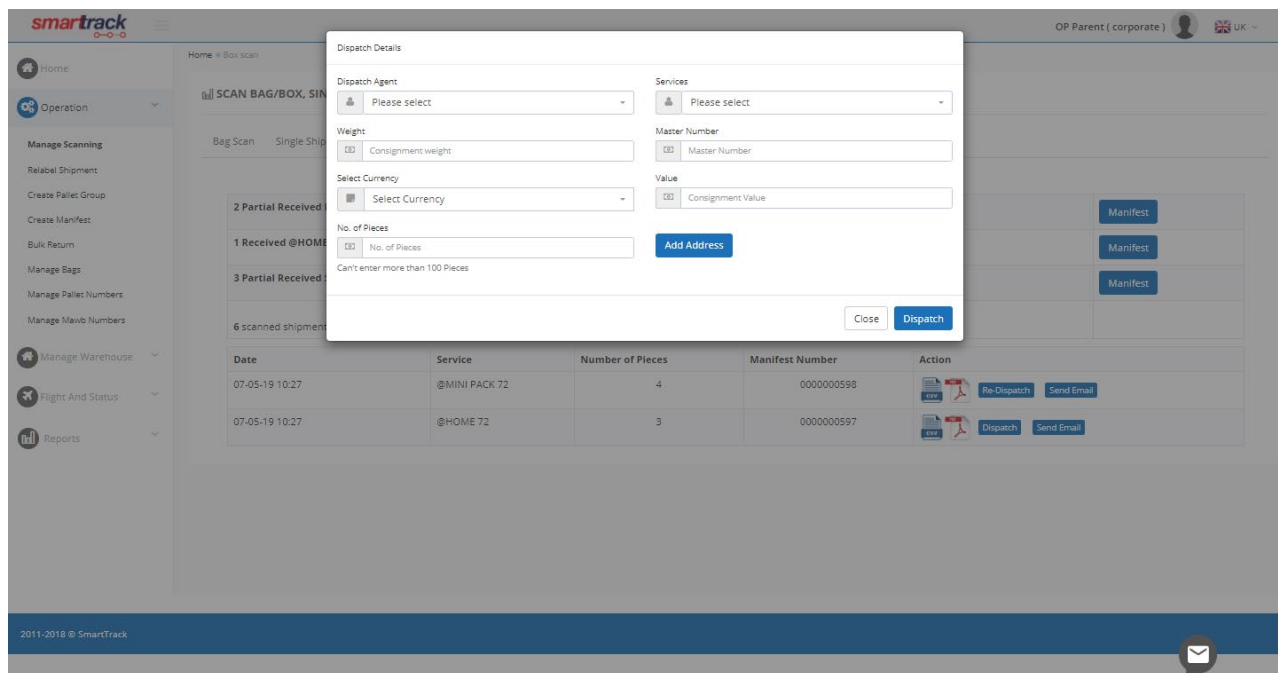

Figure 3-13 Dispatch Popup

User can also download its csv and pdf file as well

3.2 Relabel Shipment

Operation user can relabel any shipment that client has created to meet delivery requirements. When user enters tracking number, it populates all of its information and service assigned to that service. User can update any field and can also change its service as well but he is restricted to assign any of the service that is already assigned to that account to make sure that the transmission is smooth and doesn't affect the user portal.

Figure 3-15 Relabel Shipment

3.2.1 Relabel Consignment List

All the parcels that have been relabeled are listed here with their old and new tracking numbers. The user who has relabeled the consignment is also populated. User can also view its consignment details, tracking details and old new labels as well from “Tools” drop down.

3.5 Bulk Return

It happens that sometimes your destination address is not valid or for any reason you are unable to deliver the parcel at destination point so in that case you have to send the parcel back to sender address. To cover this scenario, we have provided a functionality where user can add a duplicate parcel with same information as of previous one. User can add as many tracking numbers as he want to change those to Returned status that's why it is named as Bulk Return as shown in the screenshot given below. It will let user know for any duplicate tracking number and if the tracking number does exist in the system as well.

The screenshot displays the 'Bulk Return' functionality in the SmartTrack system. The main area is titled 'RETURN SHIPMENT'. It features a 'Status' dropdown menu currently set to 'Return'. Below this, there is a list of tracking numbers: 4011243400161696, 4011243400161697, 4011243400161698, and 4011243400161696. A 'Save' button is located at the bottom right of the tracking number list. On the right side of the interface, there are two error messages: 'Not found' for tracking numbers 4011243400161697 and 4011243400161698, and 'Duplicate Tracking Numbers' for 4011243400161696. The left sidebar contains navigation options: Home, Operation, Manage Scanning, Relabel Shipment, Create Pallet Group, Create Manifest, Bulk Return, Manage Bags, Manage Pallet Numbers, Manage Mawb Numbers, Manage Warehouse, Flight And Status, and Reports. The top right corner shows the user 'OP Parent (corporate)' and a UK flag.

Figure 3-19 Bulk Return

User can see two shipments in Manage Shipment list; one with the status of “Returned” and the other with the status of “Label Created”

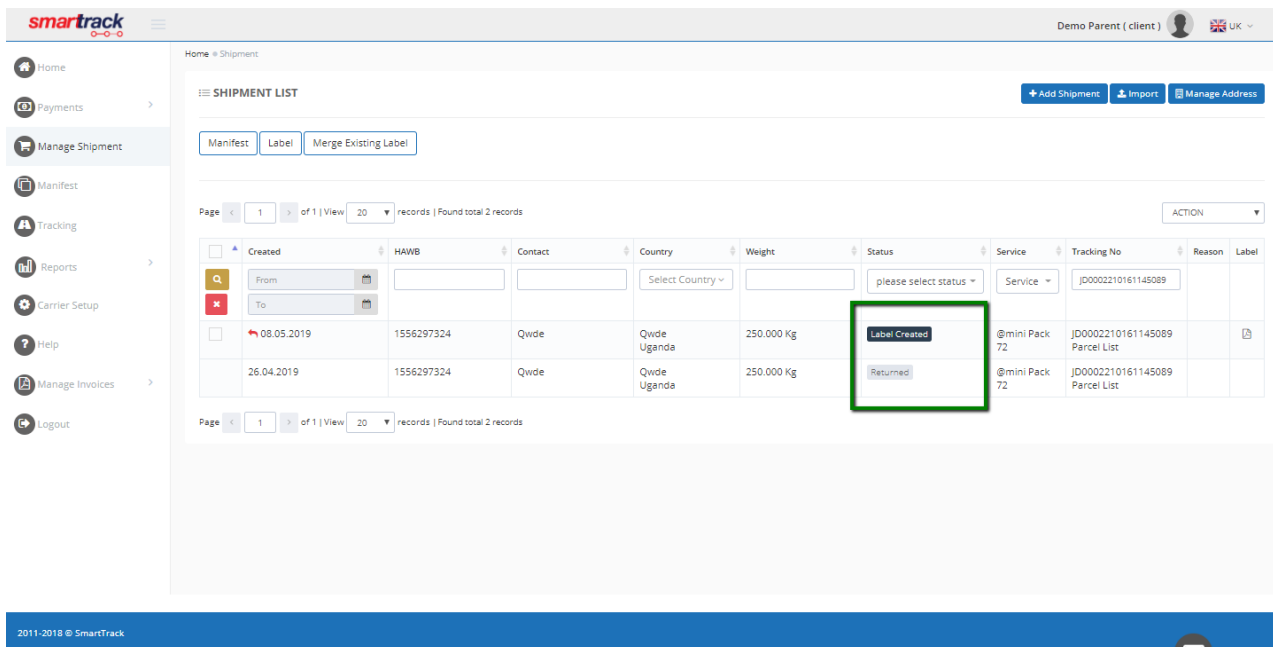

Figure 3-20 Bulk Return List

3.6 Manage Bags

User can add bags in the system from this screen. All the bags added are listed below along with its Source Country, Source Warehouse, Destination Country and Destination Warehouse. User can also add parcels into bags while creating it. These bags will be then used in Scanning screen.

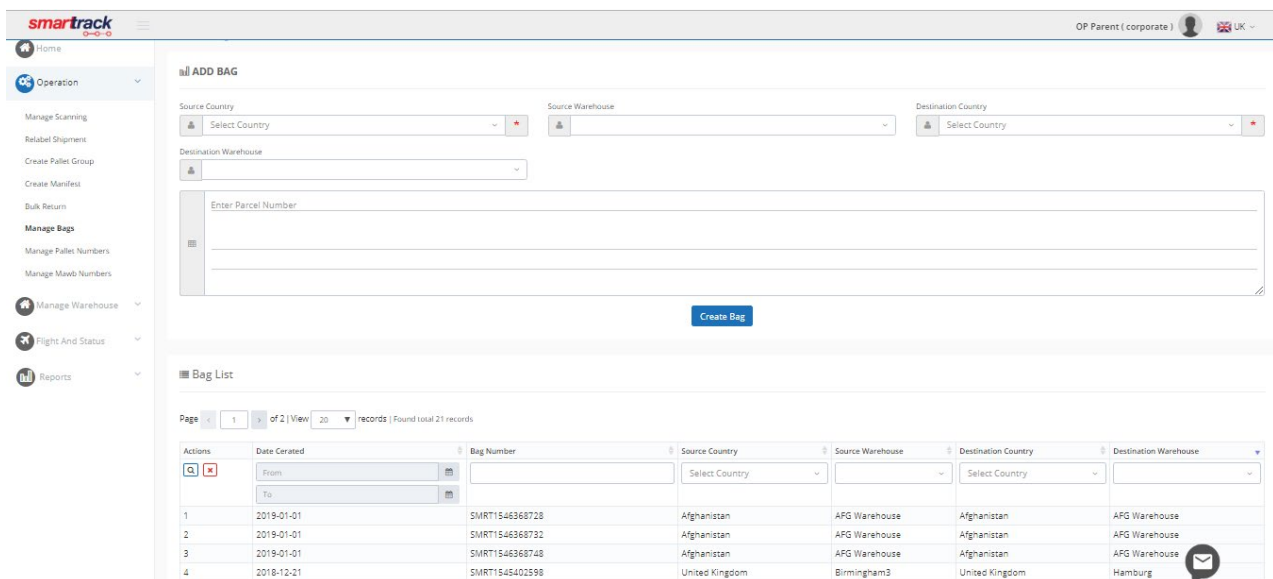

Figure 3-21 Manage Bags

3.7 Manage Pallet Numbers

User can add Pallet numbers in the system from this screen. All the pallet numbers added are listed below along with its Pallet Carrier group, Source Country, Source Warehouse, Destination Country and Destination Warehouse. User will then be able to select pallet numbers from this list at the time of scanning.

6. REPORTS

There are different types of reports that an operational user will need to look upon. Following are few of the essential reports that our system provides:

- Manifest List
- Pallet Dispatch
- MAWB Scanning
- Carrier Pallet
- Batch Scanning
- Not Found Record
- Service Scan
- Multi Master Report

6.1 Manifest List

User can view list of all the manifests that are created by operation users along with their manifest id, Service Name, Weight, Tracking number. User can also see parcels list added in any manifest and can download its csv and pdf file.

Actions	Date Created	Manifest Id	Tracking No.	Service Id	Weight	Is Dispatched	Is Email Sent

Figure 6-2 Operation Manifest List csv file

6.2 Pallet Dispatch

Pallet dispatch reports list down all the pallets that are closed and dispatched. By dispatched, we mean that these pallets are on their way to destination and user cannot alter any changes in these pallets. In the list, user can view bag numbers added in that pallet along with its Carrier group and status. User can also view label of this pallet as well.

Figure 6-6 Carrier Pallet Report csv file

6.5 Batch Scanning Report

When operational user is scanning any bag, it is listed here. It displays warehouse where it is scanned along with its master number, bag number, scanned by , tracking number. User can also download its csv file.

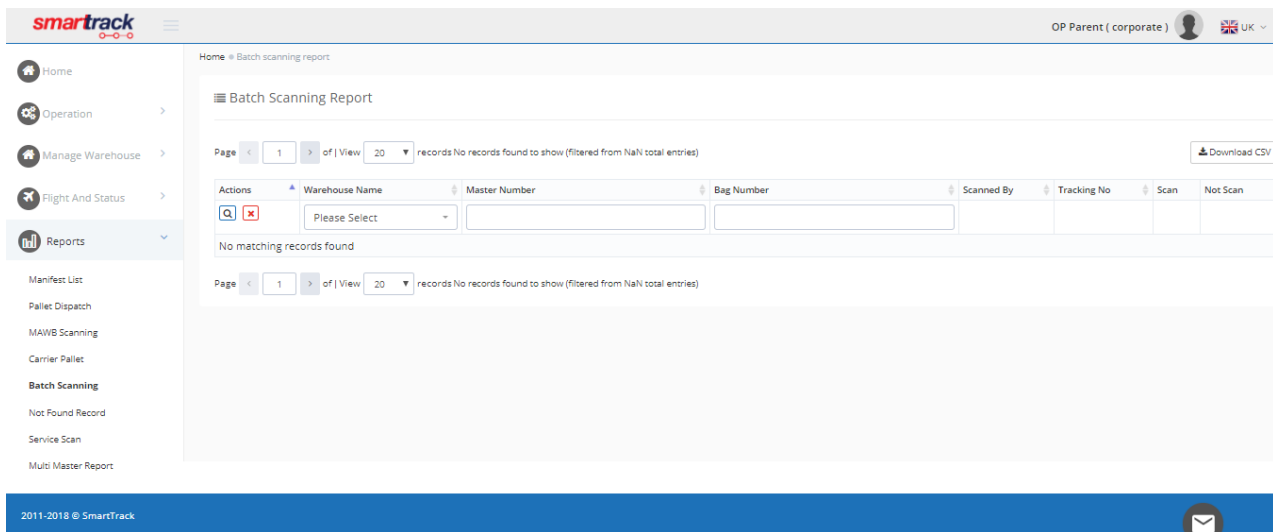

Figure 6-7 Batch Scanning Report

6.6 Not Found Report

All the tracking numbers that are not available in the system will be displayed in this screen. This is because if any user wants to scan an invalid tracking number or wrong tracking number, it will not be allowed and will be added in not found record. On end of day, it will be easier to know which tracking numbers were scanned and which were not found in the system. Scanned date along with its master number, bag numbers and dimensions are displayed in the list.

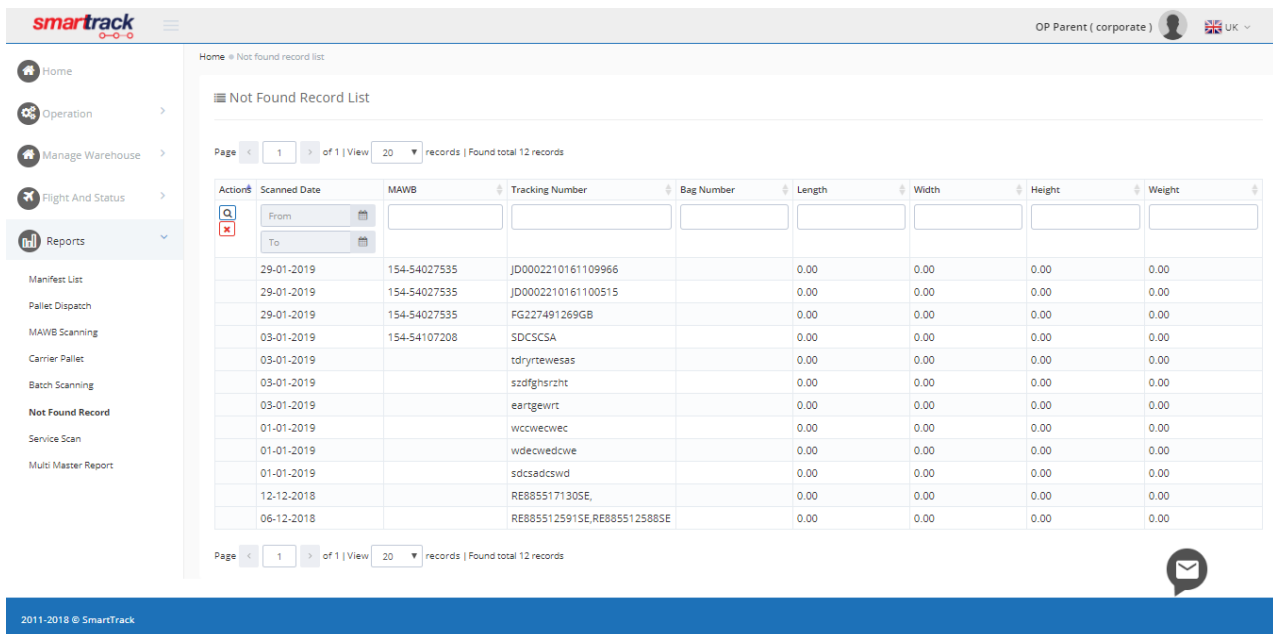

Figure 6-8 Not Found Report

6.7 Service Scan

This is a report that tells user how many shipments of all services are scanned along with their Total and average weights. User can also view in which warehouse the services are scan. User can also see the details of each services by clicking on “View” link. User is also able to filter report on the basis of services and date ranges.

The screenshot shows the SmartTrack web application interface. The top header includes the SmartTrack logo, a user profile icon, and the text "OP Parent (corporate)" with a UK flag. The sidebar on the left contains navigation links: Home, Operation, Manage Warehouse, Flight And Status, and Reports. The Reports section is expanded, showing links to Manifest List, Pallet Dispatch, MAWB Scanning, Carrier Pallet, Batch Scanning, Not Found Record, Service Scan, and Multi Master Report. The main content area is titled "Service Scanned Report" and features a "REPORT FILTERS" section with dropdown menus for Carrier, Select Service, Date Ranges, and Select Warehouse. A "Filter Report" button is present. Below the filters is a table with the following data:

Detail	Warehouse Name	Carrier Name	Total Shipment	Total Weight (Kg)	Avg Weight
