1.0 One World Product – Introduction

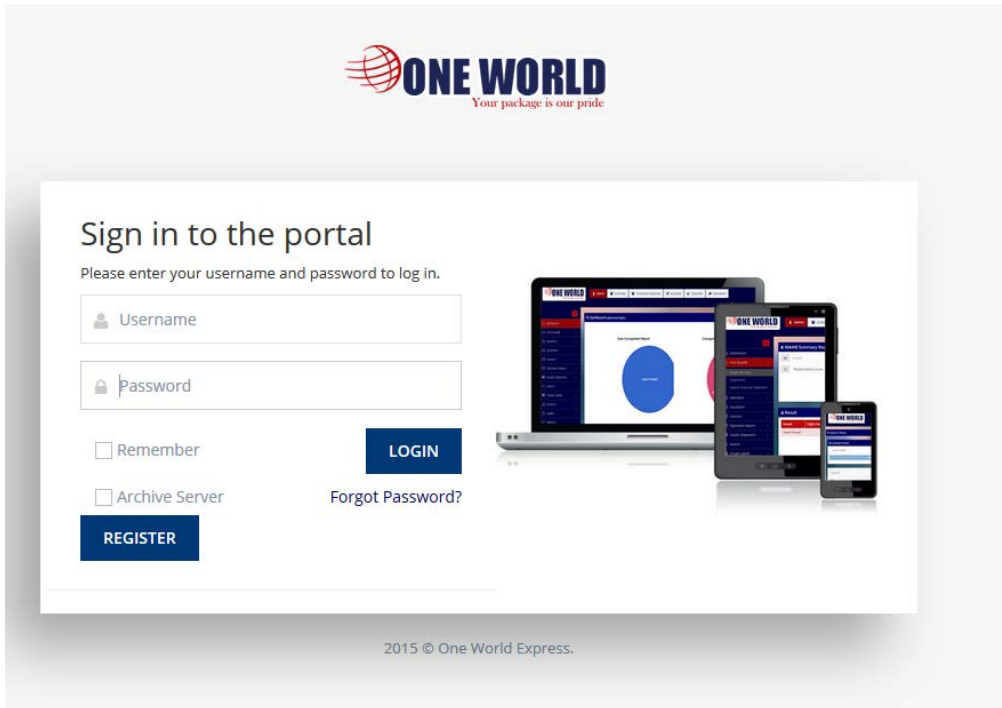

The system's concept is to provide all services available to the client without the need of separate logins and separate services and bring all the functionality of these systems into one system.

Below is the process of label creation

1.1 One World – Login

To login is very simple navigate to the Login Page Here it will look similar to the screen shot below.

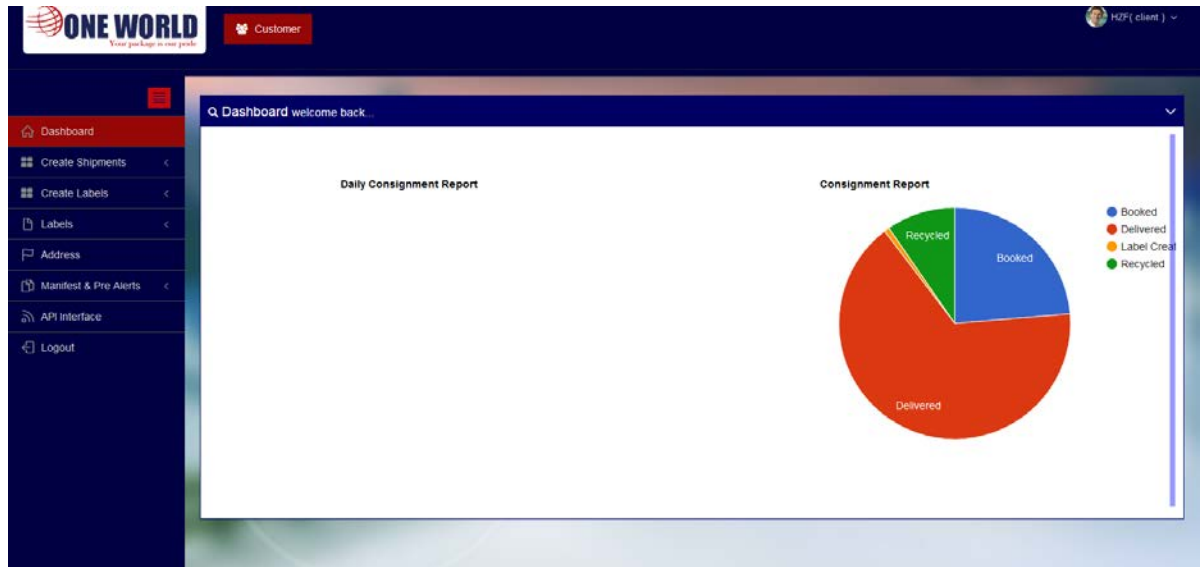

The screenshot shows the 'Sign in to the portal' page for One World Express. At the top is the One World logo with the tagline 'Your package is our pride'. Below the logo, the heading 'Sign in to the portal' is followed by the instruction 'Please enter your username and password to log in.' The login form includes a 'Username' field with a user icon, a 'Password' field with a lock icon, a 'Remember' checkbox, and an 'Archive Server' checkbox. To the right of the form is a blue 'LOGIN' button. Below the 'LOGIN' button is a link for 'Forgot Password?'. At the bottom left of the form is a blue 'REGISTER' button. To the right of the form is an image of a laptop, tablet, and smartphone displaying the One World portal interface. At the bottom of the page, the copyright notice '2015 © One World Express.' is visible.

Here you will enter your username and login credentials to access the System.

1.2 One World Tracked – Navigation

You will be presented with a screen as below with menus on left side.

When going through collapsible menu over these it will show other options like the example below.

Each menu will have many options. Below is a hierarchy of each option.

[Create Shipments] – Create Dispatch– Create Collection –Import via CSV–Amazon–

Ebay - LIST – GENERATE CSV

[LABELS] – LIST – SEARCH - RELABEL

[ADDRESS] – ENTER

[MANIFEST & PRE ALERTS- Customer Pre-Alerts – Search Pre-Alert –Hungary

Post Manifest – Manifest Report

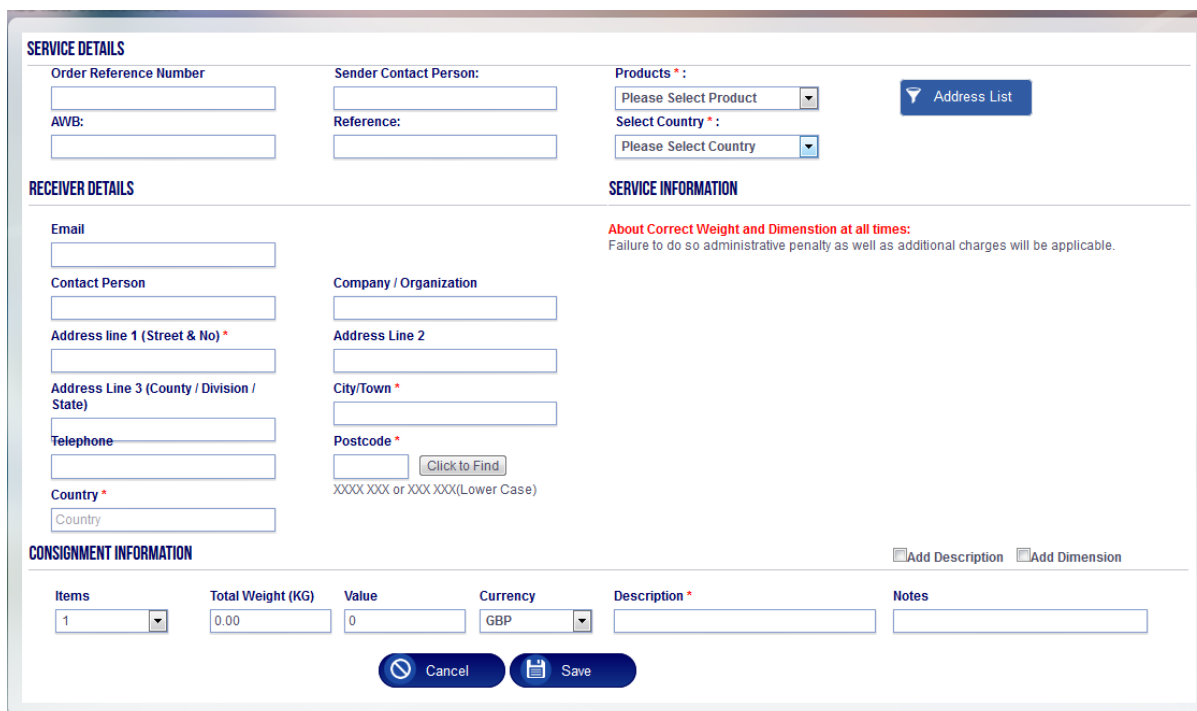

[API interface]

2.1 Create Shipments – Create Dispatch

Creating a consignment is really easy just navigate through create dispatch

After clicking you will be presented with add new consignment page that will look like this. You can create the consignment from Create Dispatch Option as soon below screen.

The screenshot shows a web form for adding a new consignment. It is divided into several sections:

- SERVICE DETAILS:** Includes fields for 'Order Reference Number', 'AWB', 'Sender Contact Person', 'Reference', 'Products *' (a dropdown menu), and 'Select Country *' (a dropdown menu). There is also an 'Address List' button.
- RECEIVER DETAILS:** Includes fields for 'Email', 'Contact Person', 'Company / Organization', 'Address line 1 (Street & No) *', 'Address Line 2', 'Address Line 3 (County / Division / State)', 'City/Town *', 'Telephone', 'Postcode *', and 'Country *'. There is a 'Click to Find' button next to the postcode field.
- SERVICE INFORMATION:** Includes a warning message: 'About Correct Weight and Dimension at all times: Failure to do so administrative penalty as well as additional charges will be applicable.'
- CONSIGNMENT INFORMATION:** Includes a table with columns: 'Items', 'Total Weight (KG)', 'Value', 'Currency', 'Description *', and 'Notes'. The table has one row with '1' in the 'Items' column, '0.00' in 'Total Weight (KG)', '0' in 'Value', 'GBP' in 'Currency', and empty fields for 'Description *' and 'Notes'. There are 'Cancel' and 'Save' buttons at the bottom.

Here you have to select the Products and select Country. For example I will add a consignment that is going to Germany and I will be using E-Europe Smart A Products.

It will look like below:

SERVICE DETAILS

Order Reference Number

AWB:

Sender Contact Person:

Reference:

Products *:

E - EUROPE SMART A

Select Country *:

GERMANY

Address List

I will now fill in all the details and get ready to submit my consignment. Once filled it should look similar to the image below

As you can see I have two ready to print. Invalid is highlighted in Red which means this will not be ready to print until you correct the errors.

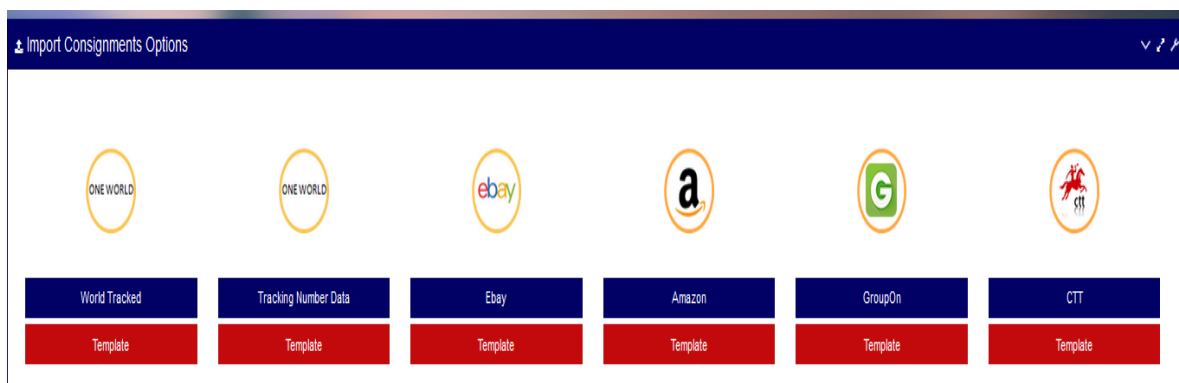

The valid ones which are showing in green has got Generate Label link where you need to click and print the label.

2.2 Create Shipments – Import Via CSV

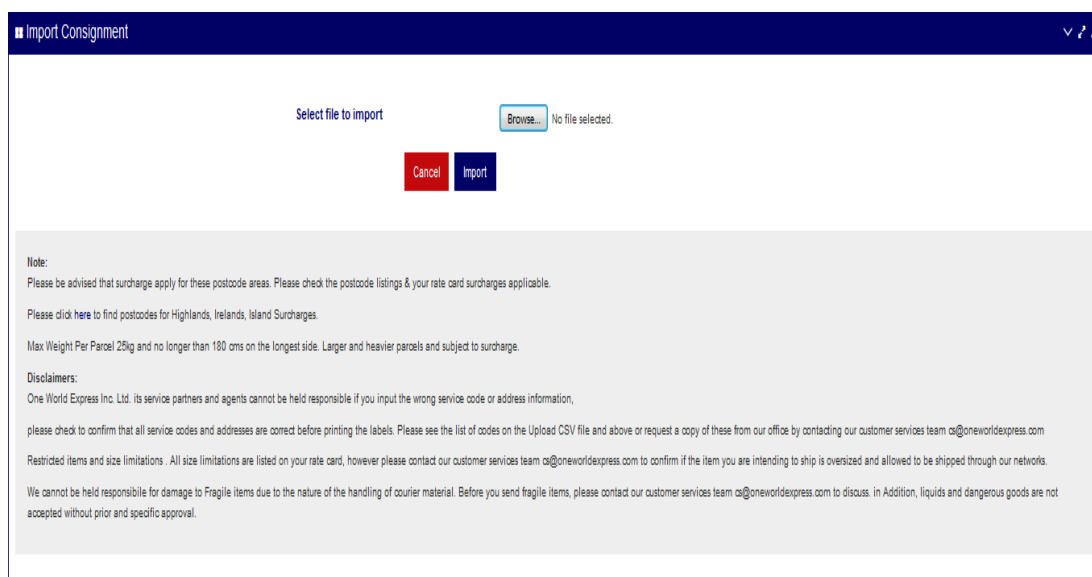

When adding many consignments using the user interface may seem a time consuming process. Which is why importing consignments makes the process quicker. To import many consignments you will need the consignment CSV import template. The template file may look like this:

Below you can see four different templates, where you can you import all the shipment at once rather than uploading one by one.

Once you click on the template E.g. One World new page will open as you can see

below, here you can import the files from your computer (CSV/excel). You need to download the template file from Template.

Import Consignment

Select file to import Browse... No file selected.

Cancel Import

Note:
Please be advised that surcharge apply for these postcode areas. Please check the postcode listings & your rate card surcharges applicable.
Please click [here](#) to find postcodes for Highlands, Irelands, Island Surcharges.
Max Weight Per Parcel 25kg and no longer than 180 cms on the longest side. Larger and heavier parcels and subject to surcharge.

Disclaimers:
One World Express Inc. Ltd. its service partners and agents cannot be held responsible if you input the wrong service code or address information,
please check to confirm that all service codes and addresses are correct before printing the labels. Please see the list of codes on the Upload CSV file and above or request a copy of these from our office by contacting our customer services team cs@oneworldexpress.com
Restricted items and size limitations : All size limitations are listed on your rate card, however please contact our customer services team cs@oneworldexpress.com to confirm if the item you are intending to ship is oversized and allowed to be shipped through our networks.
We cannot be held responsible for damage to Fragile items due to the nature of the handling of courier material. Before you send fragile items, please contact our customer services team cs@oneworldexpress.com to discuss. In Addition, liquids and dangerous goods are not accepted without prior and specific approval.

We need to import the files by clicking browse and select the CSV file to be imported and click Import which will import the CSV.

Create Shipments - CSV Format

In the Account column you should enter your account code. In **Service** column you should put DBP for domestic consignment, R1 for Europe consignment and INT for Rest of the World. In the **service_code** column you need to give the **Product Name** you are using to create the labels.

Then you can enter your reference, date submitted, company, contact, address line 1, address line2, address line3, city, country, Postcode, Telephone, Number of pieces, Weight, description, value, currency and notes.

In routing/non-routing column you need to put 1 for all the consignment Your

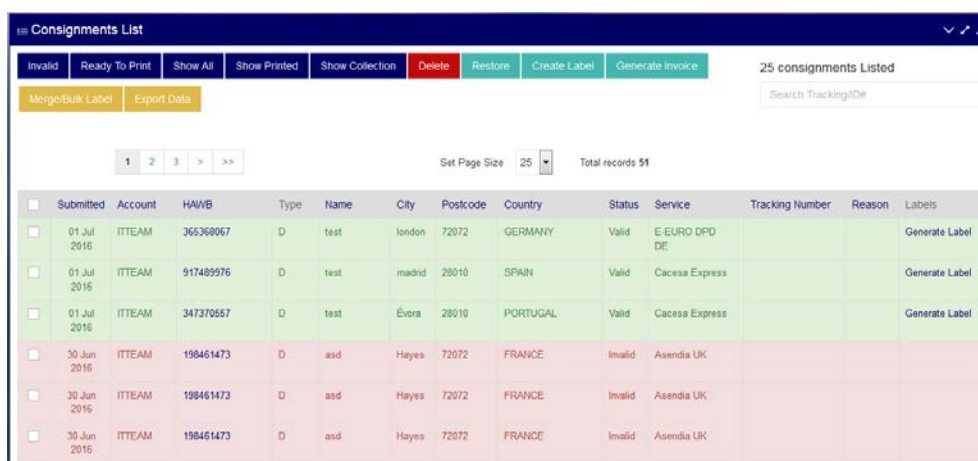

CSV should look like below:

2.3 Create Shipments – LIST

This page List shows all the consignments which you have created as below. The list shows Invalid consignment, ready to print, label printed and collection shipments. Valid consignment are shown in green while invalid are shown in red.

The screenshot shows the 'Consignments List' page. At the top, there's a dark blue header with the title 'Consignments List' and a search icon. Below the header is a toolbar with buttons: 'Invalid', 'Ready To Print', 'Show All', 'Show Printed', 'Show Collection', 'Delete', 'Restore', 'Create Label', and 'Generate Invoice'. There are also buttons for 'Merge/Bulk Label' and 'Export Data'. A search bar is present with the text '25 consignments Listed' and a search icon. Below the toolbar is a table with columns: Submitted, Account, HAWB, Type, Name, City, Postcode, Country, Status, Service, Tracking Number, Reason, and Labels. The table contains 6 rows of data. The first three rows are green, indicating valid consignments, and the last three rows are red, indicating invalid consignments.

Submitted	Account	HAWB	Type	Name	City	Postcode	Country	Status	Service	Tracking Number	Reason	Labels
01 Jul 2016	ITTEAM	365368067	D	test	london	72072	GERMANY	Valid	E-EURO DPD DE			Generate Label

30 Jun 2016	ITTEAM	198461473	D	asd	Hayes	72072	FRANCE	Invalid	Asendia UK			

There are button on top Invalid, Ready to Print, show all, show printed and Show collection button. You can click on each button and see consignments on list as you required. For example if you want to see all the Invalid consignment click on Invalid.

The screenshot shows the toolbar of the 'Consignments List' page. It includes buttons for 'Invalid', 'Ready To Print', 'Show All', 'Show Printed', 'Show Collection', 'Delete', 'Restore', 'Create Label', and 'Generate Invoice'. There are also buttons for 'Merge/Bulk Label' and 'Export Data'. A search bar is present with the text '25 consignments Listed' and a search icon.

There are other buttons for Delete, Restore, Create Label, Generate Invoice, Merge Bulk Label and Export Data. Just click on check box on left hand side of

consignment which you want to perform any of the above option and click on button as required.

Create Shipments – Restore

Restore is very simply and easy to use, if you deleted the consignment that you did not mean to delete. Simply click on ‘restore’ this will add the deleted shipment into system.

Create Shipments – Delete

If you wish you to delete some consignment just press ‘delete’.

This will delete all the selected consignments.

Create Shipments - Merge/Bulk label

With this option you can click as many as shipment you like and click on Bulk label, you will be able to see all the label on one page rather than one label on one page.

Create Shipments - Export Data

You can also export data here if you have big number of shipments and want to put them all together at once.

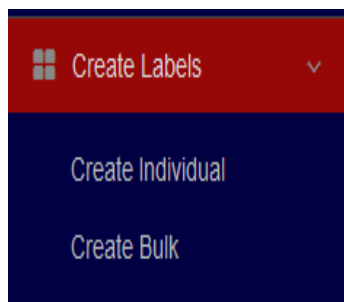

2.4 Create Consignment- Generate CSV

If you want to generate CSV for the labels you have created you can generate CSV from this menu. CSV can be generated according to date wise so you can select the date as required and generate CSV.

3.0 Create Labels- Create Individual /Create Bulk

Labels can be created individually or in bulk from this option.

4.0 Labels- List

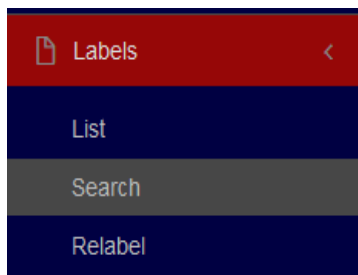

If you wish to see labels, click on list you will be able to see all the labels. Something like below. Here you can see all the shipment has been labels and are in system.

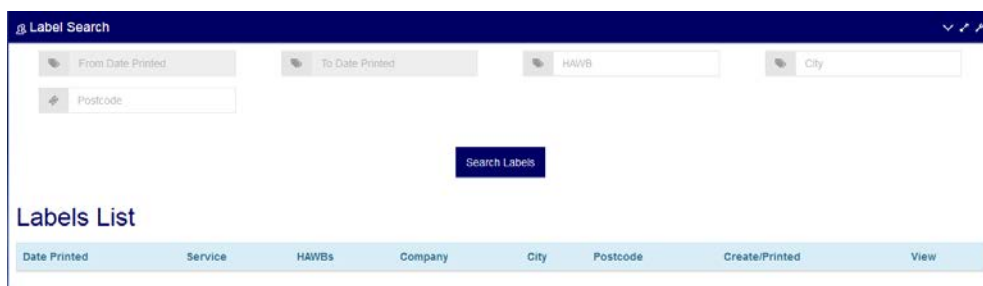

Home / Label / List			
Label List			
Advance Search			
HAWB: Print Labels Search Labels

On the same page you can search for one shipment if you know the HAWB number. To view your shipment, you can click on **'View'** this link will open with the label as you can see below. You can see the information like tracking number and receivers address and contact number.

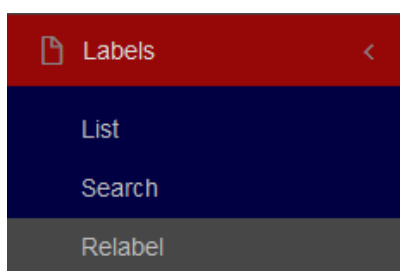

4.1 Labels- Search

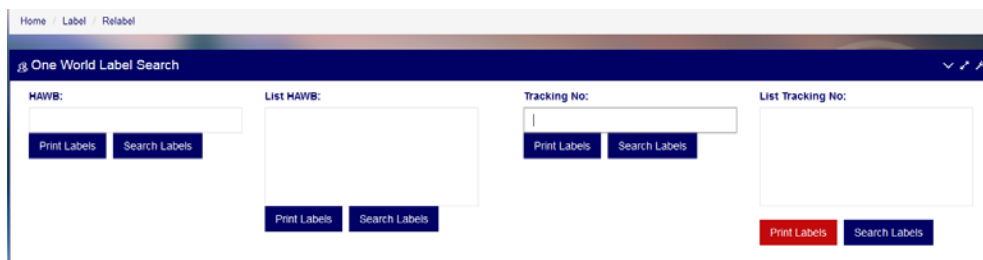

You can search the labels you created from this page. Labels can be searched with hawb, city or postcode.

4.2 Labels- Relabel

Consignment can be relabelled from this option where you can click relabel and following page appears and labels can be relabelled.

Home | Label | Relabel

Here you can search for address, import address, use address, delete, and add new address. As you can see below there is five different options for address, these are to make the smart system more easy to use.

Options : [Search] [Import Address] [Use Address] [Delete] [Add New Address] [Search Address:] [Select an Address and then click on Use Address]

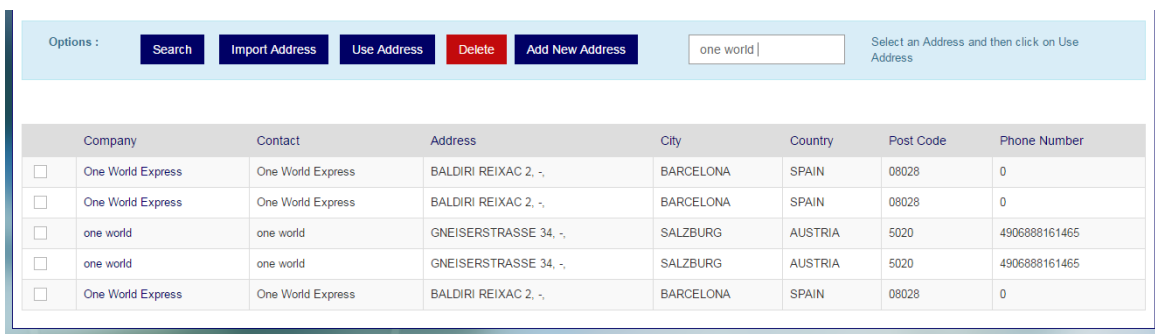

Address – Search

Search option is if you want to look into the address you can simply click on 'search' it will take you on the below screenshot. Here you can search address by post code, contact name, company and city.

The screenshot shows a 'Search Address' form with the following fields: Contact Name, Address, City, Post Code, Company, and Telephone. There is also a 'Select Country' dropdown menu. At the bottom, there are 'Cancel' and 'Search' buttons.

Below screenshot show you the search box where you can search any address that has been uploaded in system E.g. if you entre one world it will bring up all the addresses related one world.

The screenshot shows a table with search results. The table has columns: Company, Contact, Address, City, Country, Post Code, and Phone Number. The results show multiple entries for 'One World Express' and 'one world'.

	Company	Contact	Address	City	Country	Post Code	Phone Number

Address - Import Address

Import address is if you want to upload more than one address into system. You can make a list of the address in excel then you can import the excel sheet in smart system. This can save you time and help you locate the address when creating the shipment. See the screenshot below where you will see when you click on 'import addresses'. You will click on choose file it will take you on documents where you can click the excel

sheet with all the addresses.

If you have big numbers of shipment and want to put them all into the system. With import address bouton you can do that very easily.

Address - Use Address

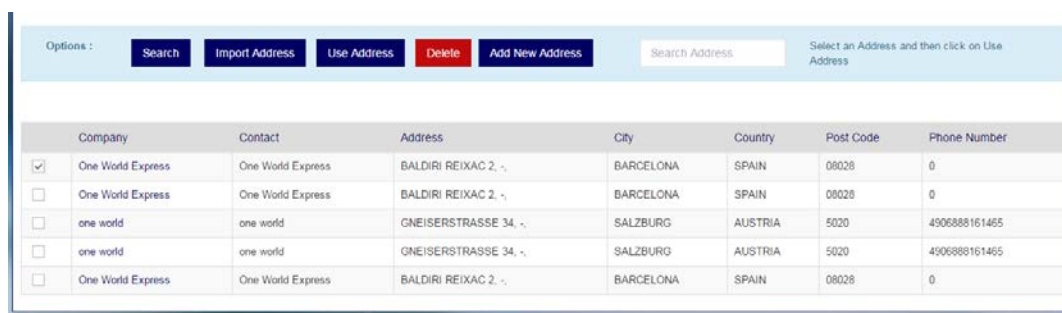

Use address help you create the consignment quicker, if you already have the address if your system you can simply click on the address and it will take you on create consignment. As you can see on below screenshot that when I clicked on use address, it took me on consignment with the address I wanted to use. Now I don't have write down all the address in the system.

The screenshot shows the 'Consignment Edit' form in the ONE WORLD system. The form is divided into several sections: 'Service Details', 'Receiver Details', 'Service Information', and 'Consignment Information'. The 'Service Details' section includes fields for 'Order Reference Number', 'Service' (set to 'One World Express'), 'Reference', and 'Select Service'. The 'Receiver Details' section includes fields for 'Email', 'One World Express', 'BALDIRI REIXAC 2', 'Address Line 3 (Country / Division)', 'BARCELONA', '08028', and 'Find'. The 'Service Information' section contains a warning about correct weight and dimension. The 'Consignment Information' section includes fields for 'Normal', '1', '0', and '0'. There are also buttons for 'Enter Data' and 'Address List'.

Address - Delete

If you wish to delete some address simply click on the addresses and press delete.

The screenshot shows the 'Address' management interface. At the top, there are buttons for 'Search', 'Import Address', 'Use Address', 'Delete', and 'Add New Address'. Below these buttons is a table with columns: 'Company', 'Contact', 'Address', 'City', 'Country', 'Post Code', and 'Phone Number'. The table contains five rows of data, each with a checkbox in the first column.

	Company	Contact	Address	City	Country	Post Code	Phone Number

Address - Add New Address

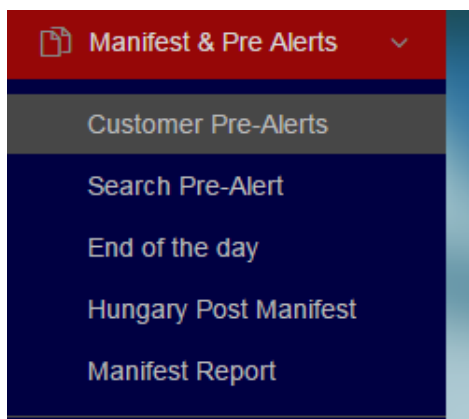

If you wish to add new address just click on address it will take you on below screenshot page. Where you add new addresses and save them in system. This address will stay until you want to delete. Again if you have more than one address you can make excel sheet and import them in system.

The screenshot shows the 'Address Details' form. It has fields for 'Company', 'Contact Person', 'Address Line 1', 'Address Line 2', 'Address Line 3', 'City', 'Postcode', 'Country' (with a dropdown menu showing 'Afghanistan'), and 'Telephone'. There are 'Cancel' and 'Save' buttons at the bottom left.

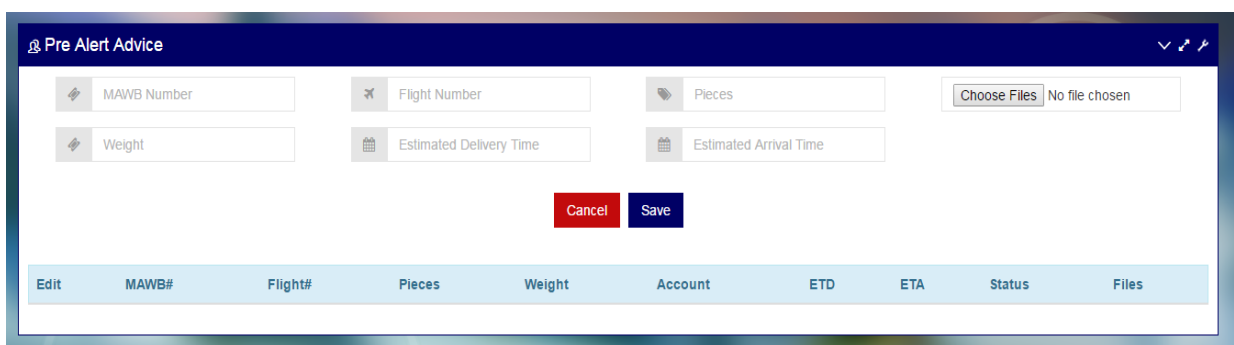

6.0 Manifest & Pre Alerts

In Manifest and pre alerts you can upload your pre alerts, search pre alert, end of the day, Hungary Post Manifest and manifest report.

6.1 Customer Pre-Alerts

Here you can upload your pre alerts so the ops team can get the pre alerts from system. This option is also good for your own reference. This pre alerts will stay save in system you can access them whenever you like. If ops did not receive the pre alerts email they can go on system and get the per alerts rather than requesting. As you can see in below screenshot here you can either add the information you can just upload the excel sheet.

A screenshot of a web application form titled 'Pre Alert Advice'. The form has a dark blue header with a dropdown arrow and a refresh icon. Below the header, there are several input fields for data entry: 'MAWB Number', 'Flight Number', 'Pieces', 'Weight', 'Estimated Delivery Time', and 'Estimated Arrival Time'. There is also a 'Choose Files' button with the text 'No file chosen' next to it. Below the input fields, there are two buttons: 'Cancel' (red) and 'Save' (blue). At the bottom of the form, there is a table with columns: 'Edit', 'MAWB#', 'Flight#', 'Pieces', 'Weight', 'Account', 'ETD', 'ETA', 'Status', and 'Files'.

6.2 Search Pre- Alerts

You can search pre alerts by MWAB, Flight Number and by Date.

PRE-ALERT SEARCH

Search

Edit	MAWB#	Flight#	Pieces	Weight	ETD	ETA	Status	Files
------	-------	---------	--------	--------	-----	-----	--------	-------

6.3 End of Day

If you created shipment throughout the day and you want to book them and dispatch it simply click on end of day. This will bring up all the shipment you created and you can book them from this option, as you can see the screenshot below. This shows that how many shipment you created on today. Once you click on 'Book' you will get link for PDF and CSV where you will be able to see all the data. You will get manifest of data which you have booked and dispatched from this option.

END OF DAY

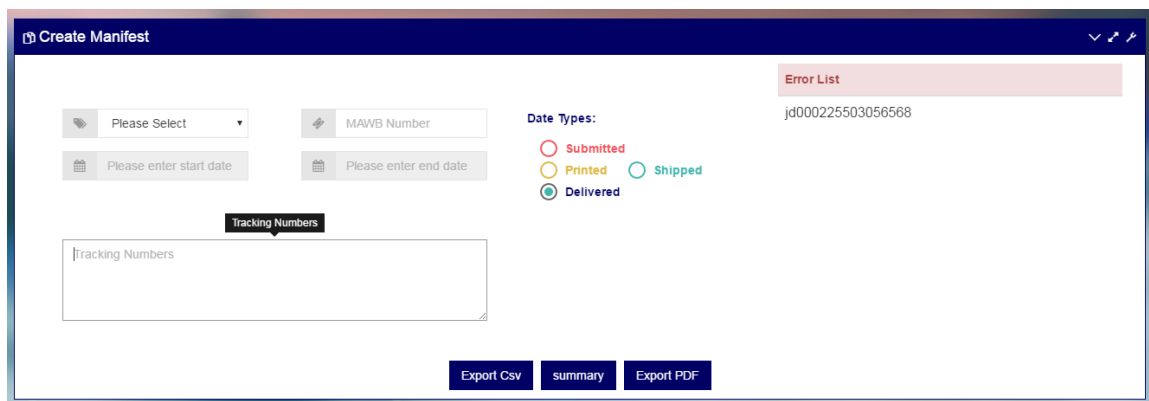

Showing non-manifested Shipments for booking less than 30 days old.

208 Total ready to be booked [Book](#)

Date	Service	CSV	PDF
01-07-16 17:30	YODEL MINI PACK	26198	26198
01-07-16 17:30	YODEL MINI PACK	26197	26197
01-07-16 17:29	YODEL MINI PACK	26196	26196

6.4 Hungry Post Manifest

Here you can you get all the data about all the shipments you sent. E.g. if you sent some shipment by yodel and want to see if they have been delivered. You will select service yodel and put all the tracking number in the box. Here you can you either export Csv or PDF link with all the data. It shows you that one has been delivered and one that are still in transit.

6.5 Manifest Report

Manifest & Pre Alerts

- Customer Pre-Alerts
- Search Pre-Alert
- End of the day
- Hungary Post Manifest
- Manifest Report**

From manifest report we can generate manifest according to agent, service, manifest Id and we can give our date range from which manifest is to be downloaded.

Manifest Report

SELECT AGENT SELECT SERVICE Manifest Id

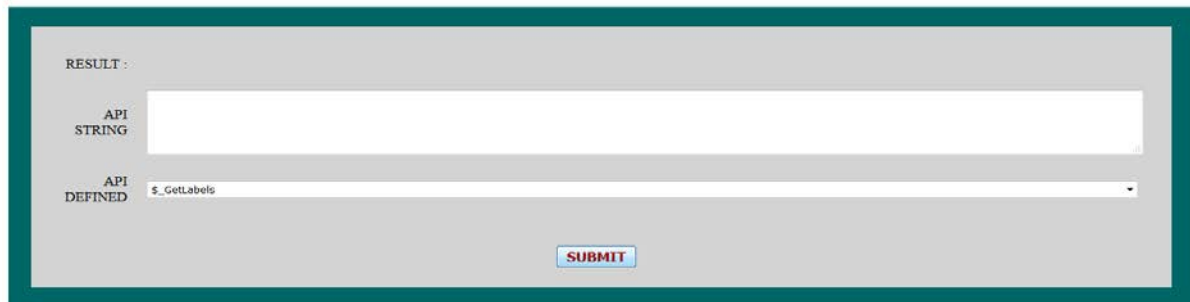

Date From Date To

Search **Cancel**

Date Created	Manifest ID	Agent	Service	Number of Boxes	Label	Flight	Mawb	Download Shipment	Send Email
--------------	-------------	-------	---------	-----------------	-------	--------	------	-------------------	------------

7.0 Creating Label by API Interface.

API interface is for developers. Labels can be created using API interface.

A screenshot of a web form for creating a label via API. The form has a light gray background and a dark teal border. It contains a 'RESULT :' label, an 'API STRING' input field, an 'API DEFINED' dropdown menu with '\$_GetLabels' selected, and a 'SUBMIT' button.

RESULT :	
API STRING	
API DEFINED	\$_GetLabels
SUBMIT	

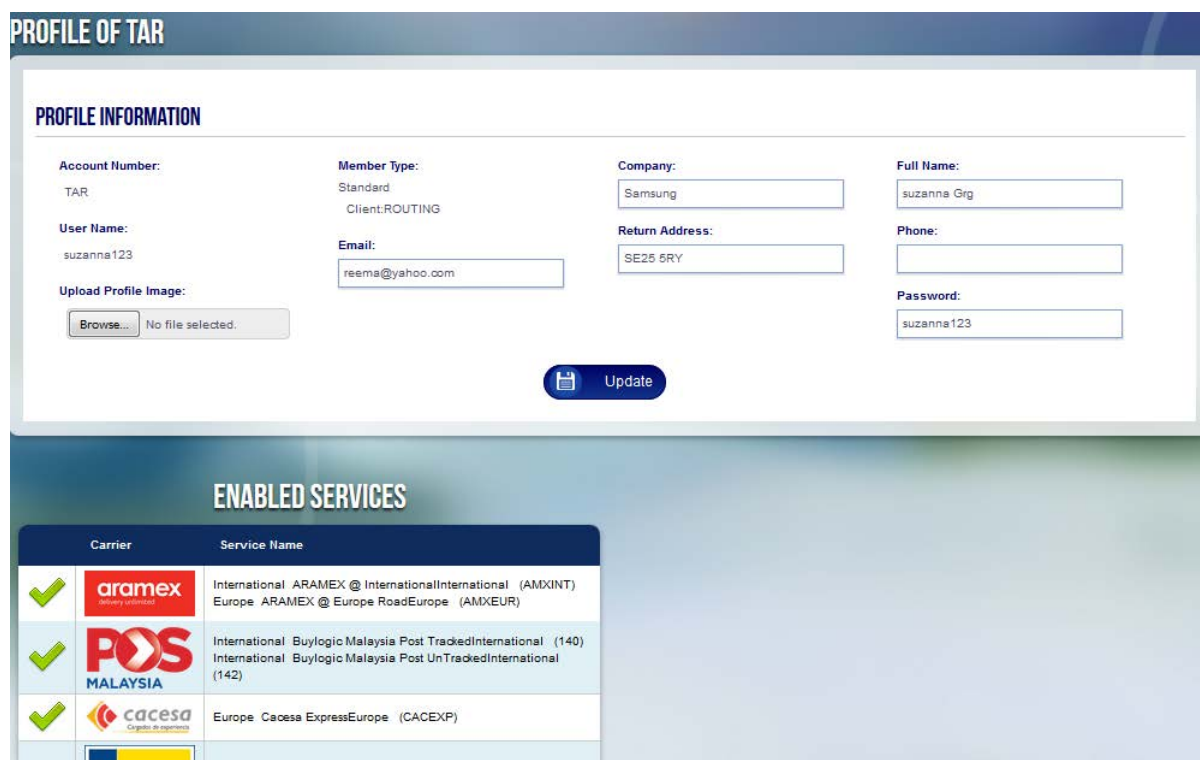

8.0 Profile Information

You can view/edit your profile information to see all enabled and available services there is by checking out your profile by clicking your name on any screen after login below is an image highlighting this area.

Here you can also upload your profile picture. You can also put your password.

You can view your account number, member type, username and services which are enabled to create labels.
